HOW TO REQUEST A CODE AND USE IT TO RE-CONFIGURE A HEX FLASH PROGRAMMING TOOL CABLE.

- 1. Download and execute "XDEVICE Toolkit" from VF-Engineering website download page.
- 2. Plug in your Hex-Flash programming cable into your USB (car is not needed).
- 3. Single click [Refresh List] and your cable ID should appear in the dialogue window.
- 4. Double-Click on your cable "VF FLASH USB" in the dialogue box to highlight it and a green progress bar will pop-up and complete. Then all the cable coding info will populate in the configuration tab as below.

Location ID #	ation ID # XDEVICE Name				XDEVICE SN & Type			
LOC. 10 #17	VEF	JASH USB			33363 - END U.	pen	Tionesi List	
onfiguration Lic	ense	Credits	End User	Security	Diagnostics	History	USB
