

**Blissco Selected to Present at Sick Kids Hospital on
Canadian Childhood Cannabinoid Clinical Trials
Not for distribution in the U.S. or to U.S. Newswires**

Vancouver, British Columbia – February 27, 2019 – [Blissco Cannabis Corp.](#) ([CSE: BLIS](#)) ([OTCQB: HSTRF](#)) ([FRA: GQ4B](#)), (“Blissco”) or the (“Company”) is a Canadian wellness cannabis brand based in British Columbia and a licensed processor, producer, and distributor of premium dried cannabis and cannabis oil. The Company is pleased to announce that it has been invited to present at the Canadian Childhood Cannabinoid Clinical Trials (C4T) Workshop at Sick Kids Hospital in Toronto on February 27 and 28.

Blissco will provide an industry perspective on cannabis research and development. Five other Canadian licensed producers including, [Aurora Cannabis Inc.](#) (NYSE: ACB), [Canopy Growth Corporation](#) (TSX: WEED) and [Tilray Inc.](#) (NASDAQ: TLRY) were also invited to participate.

“I am delighted that Blissco among other industry partners has agreed to support and participate in the C4T Workshop. This is the first time a diverse group of stakeholders interested in cannabinoid pediatric research, represented by research, patients/families, regulators, funders and industry will be under one roof,” said Stephen Barbazuk, Executive Director of the Maternal Infant Child Youth Research Network (MICYRN).

“We are honored to have the opportunity to support this project. We have a profound personal connection to pediatric hospitals, namely BC Children’s Hospital, and we feel a responsibility to support these clinical trials under the supervision of researchers and doctors to advance solutions for children facing life-threatening illnesses,” said Damian Kettlewell, Blissco CEO.

Working together, Blissco and the Ernst lab at McGill University and the Douglas Hospital Research Institute will unveil a partnership for pre-clinical research.

“We are proud to partner with Blissco to design and test non-invasive ways to better understand the effects of cannabis in developing human brain cells. In-depth pre-clinical research will build the foundation for safe, effective pediatric clinical trials in Canada,” said Dr. Carl Ernst, Canada Research Chair in Psychiatric Genetics.

About MICYRN

The Maternal Infant Child and Youth Research Network is a federal not-for-profit, charitable organization founded in 2006 to build capacity for high-quality applied health research. It now links 20 maternal and child health research organizations based at academic health centres in Canada; is affiliated with more than 20 practice-based research networks; provides support to new and emerging teams; and has established strong national and international partnerships.

A large amount of research is conducted by teams with investigators based at multiple sites across Canada. Working together in a coordinated fashion enables the sharing of innovations and reduces duplication of effort and resource use, which means more funds can be spent on doing research.
