Our Eco friendly filter not only is fantastic at getting out chemicals it is also Eco friendly. After around 6 months or more of use depending on your water usage all you will need to do is replace the media not the housing making this option very cost effective and no wasted plastic as you will see in other filtration products. All you need to do is simply dispose of the used media in flower beds or use as compost making the media 100% recyclable and purchase in bulk at a very affordable cost from us here at Healthy Hydration Home Services.

What is our Filter Made of:

Level 1: Granular Activated Carbon

This NSF Certified acid washed GAC removes chlorine, gases, heavy metals, odors, tastes, dyes, fuels, pollutants, disinfectants, pesticides, TTHM, sodium chloride, and volatile organic contaminants (VOC).

Level 2: Premium Catalytic Carbon Premium, high activated carbon reduces remaining chlorine and chloramines, removing taste and odor, giving long lasting fresh water. This media filters a wide range of PH levels and adds a final polish to the filtered water.

Level 3: Katalox Light

A light weight media that removes iron, lead, manganese, arsenic, hydrogen sulfide, and heavy metals. Also filters out particles as small as 3 microns and saves on backwash water.

Level 4: High Density Garnet Media

High hardness, high density filter media, effectively filters and provides a high quality support bed for this system.
