

Extensions and Enhancements FAQs

How are eyelash extensions applied?

Depending on desired length and style of lash, each single synthetic lash extension or fan of multiple lash extensions is applied with adhesive, one by one, to your natural eyelashes. Curl and shape can also be customized to suit your eye size and shape.

How long do eyelash extensions last?

Humans have between 90-120 lashes per upper eye line. Each day 2-5 lashes shed naturally. The lash extensions are attached to the natural lashes and will shed as your natural lashes shed. Proper care and maintenance can extend the life of your eyelash extensions up to 4 weeks. Lashes can be maintained indefinitely with regular touch-ups and re-lashes to fill in the gaps that may be caused when natural lashes shed.

Are eyelash extensions safe for my eyes?

Lash Magic lash products, extensions and adhesives are professional grade and made to the absolute highest quality standards. Our lash technicians are certified professionals who follow exclusive safety and quality performance standards in a 100% sterile environment. Your safety is our number one priority.

How much do eyelash extensions cost?

Depending on the style of lashes selected, a full set of eyelash extensions, professionally applied by one of our master technicians, can cost anywhere between \$150 and \$300.

Can I wear contact lenses with my eyelash extensions?

Yes, but only after the lash extensions have been applied. Generally, it is best to get accustomed to your new lashes before re-installing your contact lenses.

What maintenance is required after initial application?

Looking after your lash extensions is fairly simple. No picking. Brush them every morning and night. Preferably sleep on your back and use satin pillow cases. No moisture/water/sweat for 24 hrs after application. Avoid using skin and make-up products containing oils that can dissolve the lash adhesive.

Will eyelash extensions harm my natural lashes?

The stress that your natural lashes will endure will depend on a number of factors. The experience and qualification of your technician, the weight of the lash extensions, the material the extensions are made of and the quality of adhesives used to apply them. Generally speaking, heavier and longer lashes will put more stress on your natural lashes than will shorter lash styles. Your lash professional will assess the condition of your lashes on every visit and make recommendations to keep them healthy and beautiful.

Beautiful Eyes ... Mesmerize

Add a dose of glamour to everyday life. Unleash the power of your beautiful eyes. Be your own kind of beautiful. It's easy and it's fun!

At Lash Magic, our mission is to create lasting beauty and confidence in every single client. We create custom looks that are as unique as you and your life style. Professional spa facilities, highest grade quality products and highly skilled and certified technicians are exactly what you can expect on every visit. You will love our spa experience and the professional expertise, but nothing like how you will love your new look and the way it makes you feel. We unconditionally, 100%, guarantee it!

The Lash Magic Studio Experience

We invite you to experience the exceptional. Lash Magic is your luxury retreat for expertly applied eyelash extensions, lash fills, eyebrow enhancements, eyebrow tinting and lash lifts. Our sole focus is giving you an remarkable guest experience that includes consultation, customization and care.

Consultation

Our expert technicians are trained to assess your natural lashes in order to select lash extension lengths and thicknesses that preserve and strengthen their health. At every appointment, your lash technician will walk you through the lash extension procedure and help you choose a length and style that best reflects the look you're after.

Customization

With three different service options available, Classic, Hybrid and Russian Volume each offering different curl and shape options to best suit each eye shape. Want a bold, show-stopping set? Our Russian volume application is for you! Or maybe you're looking for something a little more natural? Start off with our classic application instead. Want something in between? Hybrid lashes are calling your name!

Application

Our lash extensions are 100% lush and 100% safe. They're made of a light-weight premium synthetic material with long-lasting beautiful curl. Each lash extension is individually applied with sterile adhesive to your natural lashes, up to 120 per eye. Our exclusive lash design technique ensures you'll leave our salon with the absolute best, custom eyelash extensions for your fabulous features.

Lash Services Options Explained

Full Lash Set vs Lash Fill vs Touch-Up

If it's your first time getting eyelash extensions, you'll want to start off with a full set. That's where, using our exclusive lash design technique, we'll apply custom lashes across your full lash line. Depending on the application method and lash level (fullness) you select in your lash design consultation, the process can take up to 2 hours.

You will shed 20%-30% of your natural lashes every two weeks. This will leave gaps in your lash line. We can restore your lash look to all its beautiful fullness with a lash fill. Most of our guests come in every two-three weeks for a Lash Fill. This typically takes about 30-45 minutes. At least 50% of the original lash extensions must be present or you will need a full lash set.

Keep your Lashes looking flawless with our Touch-Up ... up to 7 days after your full lash set. This quick 25 minute session will ensure your Lashes are looking their fullest. At least 75% of the original lash set must be present or you will need a lash fill or possibly a full set.

Lash Extension Style Techniques

Classic

1 to 1 or 1:1 One lash extension is applied by isolating one natural eye lash at a time to achieve a natural look and effect.

Hybrid

Mix of Classic and Volume Lashes. Hybrid lashes add a little extra volume and a fuller lash line. The perfect blend of fullness and texture ... the luxe look.

Russian Volume

Two or more eyelash extensions are hand-made in to a fan shape and attached to one natural lash using minimal adhesive to create a more dramatic effect and fluffy appearance.

This Is Your Part

Before Your Appointment

To maximize the time with your technician, arrive for your appointment with clean eyes and follow these tips:

- ✦ Remove all make-up, cream, lotions and dirt around your eyes
- ✦ Remove contact lenses and bring eyeglasses to your service
- ✦ Do not curl eyelashes the day of your service
- ✦ Do not schedule your appointment less than 48 hours after lash removal, tinting, perming or any other application that may have irritated your eyes/eye lids.

After Care

A little care to ensure lasting beauty;

- ✦ Do not wet lashes for 24 hours after application
- ✦ Do not exercise, tan, sauna or swim for 24 hours after application
- ✦ Do not touch lashes, only use a lash wand brush
- ✦ Use a satin pillow case and avoid sleeping on your face
- ✦ Clean lashes with a lash cleanser regularly to prevent buildup and infections. Avoid direct shower water spray.
- ✦ Brush your lashes daily
- ✦ Avoid using any oil based products or mascara around your eyes. Oil will break down the lash adhesive causing lashes to fall out.
- ✦ You naturally shed 2-5 lashes per day. In 3 weeks you will shed up to 60% of your natural lashes. The extensions are attached to your natural lashes. Lash fills will be required every 2-3 weeks.

You May Also Like These Popular Services

Lash Lifts

A lash lift is essentially a perm for your lashes that offers eye-popping results by creating a natural curl and lift. Be ready to say goodbye to your mascara and lash curler and shave some time off of your beauty routine. A tint can be applied to your lashes after they're lifted, for darker and thicker looking lashes.

EyeBrow Waxing and Contouring

Looking for the perfect, most beautiful brows to complete your look? Groomed and enhanced brows can transform your face, enhance your eyes and show the most confident you! Leave it to our wax experts to give you that perfect brow look. Brows can also be tinted to match your lashes.
