

## Waxing FAQs

### Can I get waxed if I am on medications?

It is best to refer to your doctor for questions about meds. If you are using Retin-A or Differin, we advise that you stop use 7 days prior and 7 days post your wax reservation. We will not wax you if you are on or have used Accutane in the past 6 months and a doctor's note will be required for us to provide waxing services.

### Can I get waxed if I am having my period?

Yes, but be aware that the bikini area is more sensitive during this time so you may experience more pain than usual. You will also have to wear a tampon during the wax service of any private areas.

### Can I get waxed if I have a sunburn?

We do not perform waxing services on any sunburned, irritated or unhealthy skin areas.

### Is there an age limit for waxing services at Sun Magic?

At Sun Magic we require guests under the age of 18 to have parental consent for wax services.

### What if I have piercings and tattoos?

Waxing does not cause any problems to healed tattoo areas. In fact it will enhance the colours by removing dead surface skin cells. We recommend the removal of piercings from any areas requiring waxing as we can only wax around the piercing and some hairs may not be removed.

### Bumps and Itching after waxing?

Some bumps are may be possible from post wax irritation. These will go away on their own within a few hours to a few days. To calm your skin we apply an antiseptic lotion that aids in bump and ingrown hair prevention. It is available for home use as well. Some itching may occur post waxing but try your best not to scratch these areas to prevent further irritation.

### Sex after waxing?

If you have had a bikini or brazilian wax, we recommend that you wait at least 24 hours to give your skin a chance to heal and for the hair follicles to close. This will prevent any skin irritation.

## Beautiful Skin ... Beautiful You

You know the old saying ... "beauty is skin deep"? At Sun Magic Spas we believe that beautiful skin is the window to the beautiful you! Removing unwanted body hair shows off your skin ... revealing a more radiant, confident and beautiful you! The version of you that is bold, inspiring and true to yourself ... wear your own colours, speak your own language and make your own dreams come true.

Sun Magic skin care services are dedicated to you and the woman you are. The latest skin care technology, beautiful clean environment, professional staff and value pricing ... 100% satisfaction guaranteed!

## The Benefits of Waxing

Getting waxed by a professional is truly a "treat yourself" experience. Most people will find that waxing is a far superior result to other temporary hair removal options like shaving, epilation or hair removal lotions. Top benefits of waxing include;

### Skin Health

Waxing exfoliates dead skin cells leaving your skin fresh and renewed.

### Smoother Skin

By removing hair from the root and exfoliating dead skin cells your skin will be super smooth.

### Long Lasting Results

By removing hair from the root it will take much longer for it to re-grow than with shaving.

### Thinner and Finer Hairs

Hair that grows back after waxing is finer, softer and sparser.

### Minimum Irritation

Magic Wax is formulated to cause minimal or no pain, irritation or redness.

## Magic Wax ... The Waxless Wax

Magic Wax is actually not a wax. It is the all natural 100% organic hair removal option. A self-preserving antimicrobial compound that is specially formulated to give you virtually no pain, irritation or redness that is associated with regular wax products. Unlike regular wax, Magic Wax is so gentle you can apply makeup, swim and tan after your treatment. It is applied at a warm, luxurious, bath water temperature for your maximum comfort. After the hair is removed a patented antiseptic lotion is applied to the area that cools and protects the empty hair follicles, helping prevent bumps, irritation and ingrown hairs! Total experience worthy of a Queen!

## The Waxing Experience

At Sun Magic, we want you to have the most positive and fun waxing experience. Here are some tips and guidelines to help you achieve the best wax ever ...

### Before your wax appointment

- ◆ Do not use products that contain retinoids, glycolic or salicylic acids at least 7 days prior to any face waxing appointment.
- ◆ If you have taken Accutane in the past 6 months you cannot have any wax services and will need a doctor's note to wax.
- ◆ If your skin has a sunburn, injury or health condition at the time of your appointment, you cannot have a wax on that area.
- ◆ Waxing intimate areas ... make sure you have no STDs.
- ◆ Your hair should be at least 1/4 inch long to allow the wax to grip around the hair. If you have been shaving, allow at least 2 weeks before your reservation.
- ◆ Be courteous to your Wax Specialist about cleanliness. Please bathe intimate areas prior to your appointment.
- ◆ Wear loose comfortable clothing and cotton panties if you are having an intimate area waxed.

### Your wax appointment

- ◆ When you arrive you will be greeted by a Guest Services Associate who will check you in. You will wait in the lobby area where your Wax Specialist will come to escort you to a private treatment suite.
- ◆ Your Wax Specialist will ask you to remove garments from any areas to be waxed. This will allow waxing without interruption and prevent wax from getting on your clothes.
- ◆ First we will cleanse the wax area and apply a protective and soothing pre-wax oil.
- ◆ Next, warm Magic Wax will be applied to the treatment area and the hair will be removed using wax strips that adhere to the wax. Pain during this process will depend on your mindset. Most customers will find the Magic Wax experience virtually painless.
- ◆ Finally, we will rejuvenate the skin by applying a specialty lotion formulated to cool, protect and minimize outbreaks and ingrown hairs.

### After your wax appointment

Your first wax removes the hairs that are exposed above the skin. Since hairs grow in different cycles, your subsequent waxes will remove the hairs that have not yet sprouted. After a few waxes all the hairs should be growing in the same cycle. Once your first wax is out of the way, every waxing gets easier and easier as long as you don't shave. If you shave, the next wax will feel much the same as the first one. Additionally, shaving between waxes can make you itchy and cause ingrown hairs. Usually, your wax will last 3 to 4 weeks, but everyone is a bit different. We recommend your next wax appointment once your hair has grown back to at least 1/4 inch long.

## Popular Waxing Services

### Intimate Area Waxing

Are you getting ready for or considering your first intimate wax? Don't be alarmed. At Sun Magic, we make the experience smooth and luxurious as possible. The pain that sometimes gets associated with waxing of intimate areas is mostly the result of anxiety and tension one might feel from being naked on a wax bed. Trust us, it is nothing we have not seen before. Just relax and view the experience as pampering for your skin.

### Bikini vs Brazilian

- ◆ **Bikini and Bikini Line** - Bikini Line refers to tidying up your panty line, the sides and the top, the hairs that would peek out if you were wearing a bikini. Bikini is Bikini Line plus everything in the front. You could leave a small strip, triangle or square, or nothing at all ... personal preference.
- ◆ **Brazilian** - Brazilian is Bikini all the way to the back with an added butt strip. Usually, this is the complete nude look but you could choose a strip, square or triangle in the front.

### EyeBrow Waxing to Achieve the Perfect Look

Looking for the perfect, most beautiful brows? Groomed brows can transform your face, enhance your eyes and show the most confident you! Leave it to our wax experts to give you that perfect brow look.

If this is your first time this is what you can expect ...

- ◆ Our wax specialists will walk you through the process and help you choose the best brow shape.
- ◆ A little discomfort is common but gets better each waxing
- ◆ Additional trimming or tweezing may be required to snip the longer hairs and get the pesky strays.
- ◆ Slight redness may occur in the treated areas so it is best not to plan any special even for the same day.
- ◆ Eyebrow hair tends to grow more quickly than other areas so keeping that perfect and flawless look may require a touch-up every 2-3 weeks.

## Male Waxing Services

Gentlemen, sorry, we didn't forget about you. While this brochure is dedicated to our female clients, we do offer a full compliment of waxing services for men. Exception to this is the male intimate area wax ... also called "the boyzilian". We do not offer that service at this time. In general, men tend to have more body hair and larger areas of body hair. There may be additional surcharges for services on such areas. Please ask for a consultation quote prior to booking any appointments.
