

UKAS CALIBRATION

Spectrographic can offer UKAS calibration on our full range of Tensile Impact and Hardness equipment through one of our service suppliers.

With our tailor-made service contracts, we can ensure your equipment is always kept in a current state of calibration.

CERTIFICATION OF HARDNESS TESTING MACHINES IN SERVICE

Direct verification of Vickers hardness testing machines - HV0.2 to HV100

Indirect verification of Vickers hardness testing machines - HV0.1 to HV100

To back up our range of Hardness Tensile and Impact machines we have an agreement with a 3rd Party UKAS laboratory to provide on-site UKAS calibration over the whole of the UK and overseas.
