Report date: 09/01/2023

**Analytical Report:** AR-730-2022-00001681-01**Sample Code:** 730-2022-00001681Weight / volume 60 g  
Ordered by Rebecca Spicer  
Submitted by Rebecca Spicer  
Sample reception date 23/12/2022  
Start/ end of analysis 23/12/2022 / 09/01/2023**Information supplied by the customer:**Customer reference AEORHEP0926  
Sample description NIGEH025212-SAORG Lions Mane Mushroom Fruiting Body Powder (Hericium erinaceus) Organic ## AEORHEP0926**Test Result**

## General analysis

**HEC1J<sup>1)</sup> Beta-Glucan originating from yeast and moulds**

Method source: Internal Method, W55107, Enzymatic-spectrophotometry

Parameter	Unit	Result	LOQ
Beta-Glucan	% [w/w]	53.1	0.6

1) The determination has been outsourced to Eurofins Food Testing Netherlands (Heerenveen), Netherlands

LOQ: limit of quantification

LOD: limit of detection

Result +/- extended measurement uncertainty (95%; k=2), sampling not included.

The results exclusively refer to the actually analyzed portion of the sample delivered and therefore they do not have to be representative of the product or surface (in case of swabs) from which the sample was taken. The test results apply to the sample as received from the customer. Data supplied by the customer can influence the validity of test result. Any publication of this report requires written permission. An excerpt publication is not allowed.
