

1. MTM Platform

Heavy-duty steel main support connects bike rack to 2" receivers, hauls up to 200 lbs., supports track/chock adjustability and the attachment of innovative components.

2. MaxHold Mini Rear Tire Holder

Scaled down deep V, adjustable laser cut track wedges electric bike rear tire sizes up to 5" wide and adjusts up to a 52" wheelbase.

3. ZeroWobble+ Hitch-Mount

Upgraded mount eliminates rack movement laterally in transport and requires fewer tools for installation.

4. StableStop Chock

Adjustable front tire mount secures electric bike tires up to 5", adds lateral support, and holds electric bikes upright while securing tie-downs.

5. BroadPull Arm

Wide tie-down arms optimize strap angles and improve leverage to offer maximum stability for electric bikes on the rack while in transit.

6. Multi Bike Compatible

Innovative mechanism allows for up to 2 additional bike racks to be attached. Additional 100 lbs. supported per electric bike.(Coming soon)
