FEATURES

A-Control Panel
A1-Power Indicator Light
A2-Audio Input Phono RCA
A3-Audio Output Phono RCA
A4-Bass Volume Adjustment
A5-Volume Adjustment & Power On/OFF
A6-9V 1A DC Power Input Jack
A7-Headphone Jack

B-Accessories Supplied
B1-3m RCA Stereo to 3.5mm stereo plug cable (1 PC)
B2-INPUT: 100-240V AC 50/60Hz
OUTPUT: 9V DC 1000mA 9W Main POWER Adapter.
B3-RCA female to female barrel adapter (2 PCS)
B4-0.15m RCA stereo Female to 3.5mm stereo male cable (1 PC)

C-Audio Specifications
Signal -to-Noise Ratio (Amplifier): Subwoofer: >50dB
Satellite: >60dB
Frequency Response: 60Hz~15kHz
Distortion: Subwoofer: <4% (F=100Hz)
Satellite: <1% (F=1kHz)
Input: DC9V / 1A

IMPORTANT: The power supply must be a fixed voltage with good main suppression.
FUNCTIONS:
- Foldable construction for ease of storage and portability.
- Side control panel with volume, bass control, input/output jacks.
- Ergonomic design with full back support.

READ BEFORE USAGE:
- Always make sure velcro flap is attached before moving.
- Always make sure velcro flap is attached before sitting in the chair.
- Excessive use of audio equipment could lead to hearing loss.
- Excessive sound pressure from earphones and headphones can cause hearing loss.
- Children under the age of 13 should not use this product without adult supervision.
- Strictly for indoor use. Do not expose to direct sunlight, moisture or extreme temperatures.
- If the cover becomes wet, disconnect the power immediately and don’t use until it is completely dry.
- Do not attempt to remove the cover or any components. Removal of the cover or tampering with components puts you at risk for injury or death from electrical shock.

SET UP:
1. Lift X Rocker out of box.
2. Keep the chair in the folded position and place it on the floor so that back side of the chair is touching the floor and the bottom of the seat is facing up.
3. Review the set up diagrams to familiarize yourself with the X Rocker’s components, accessories and set-up.
4. Pull and secure the velcro flap.
5. Unpack the power adapter and connect it to the main power outlet, then to the power jack on the control panel (A6).
6. Press the power button and confirm that the power indicator light (A1) is on.
7. Follow the connection diagrams. They show how to connect the X Rocker to the audio source of your choice.
8. Adjust the bass and volume levels to your preference.. start rocking.

Answers to frequently asked questions are available at www.x-rocker.co.uk.
Use the Contact Us online form or call +44(0)1992 450333.
IMPORTANT: Refer to TV Manual for the audio outputs your TV has. You will require:

- Headphone socket
- Red and White RCA (not next to a yellow socket)

If you have a scart socket, you will need a scart to an audio output adapter.

---

**Wired Connection**

**Direct connection to game console**

If you use component or AV cable to connect console to TV:

- Fit the B3 connectors to the ends of the B1 cable
- Unplug the Red and White plugs of the console’s AV cable from the TV, leaving the Yellow(video) plug in place.
- Plug the Red and White plugs of the console’s AV cable into the B3 Connectors on the Rocker’s B1 cable.

*Component or AV cables are supplied with new models of PlayStation 3, Xbox Elite and Wii, as well as earlier generation consoles.*

If you use HDMI cable to connect to TV:

Connect Rocker to one of TV’s Audio Out connections. Most HD-ready TV sets have some combination of RCA, mini-plug or optical audio interfaces enabling audio connection to accessories. Many have all three.

- RCA connection is direct to the RCA plug terminations of the Rocker’s B1 cable, but make sure you are connecting to an Audio Out pair. If your TV has only two RCA sockets and they are not marked Audio Out, they are probably input sockets and cannot send audio information to the Rocker.
- Mini Plug connection. Mini Plug sockets are often found on the front or side of the TV set, marked with the headset icon². Fit the RCA-to-Mini Plug adapter [B4 on instructions] to the RCA ends of your three-meter cable [B1 on the instructions], converting your three-meter cable to a mini plug-to-mini plug connector. Plug one end into TV’s headset socket and the other into Rocker’s mini Plug input socket. (This is same configuration as for MP3 and other portable / handheld devices.)

NOTE: Audio out volume through this outlet is usually separately adjustable from speaker volume. Please consult TV’s user guide for how to regulate output.

- Optical Audio Out: A few models of TV only have optical audio out. If you have one of these sets, you will need an optical to cable or optical to RCA coaxial adapter, sometimes called a Toslink to RCA adapter, and some connecting cables. There are several models of adapter available at reasonable prices from general electronic retailers and HD specialist shops and web sites.

---

**Wireless Connection**

- If you use the console’s Component or AV cable: For direct connection to a game console, fit the mini-plug end of the B4 Mini Plug-RCA adapter to the Rocker’s transmitter. Fit the RCA socket ends to the red and white audio plugs of the component or AV cable. If they are plugged into the TV, remove them, leaving the yellow video cable in place.
- If you use HDMI connection to the TV: Fit the Rocker’s transmitter to an available audio-out on the TV, using the appropriate connector mini-plug to mini-plug for the headset audio-out, or mini plug-to-RCA for RCA audio-out.
- Other sound sources: Connect transmitter to MP3 players or handheld games using mini plug-mini plug connector. For other devices such as stereo amplifiers, locate the most suitable audio output. Connectors compatible with most sound sources are included with your X Rocker.

GO TO WWW.X-ROCKER.CO.UK/CONNECTIVITY.PHP FOR MORE INFORMATION ON OTHER CONSOLES AND DEVICES.
TROUBLE SHOOTING

–Unable to connect to game console–

Most gaming consoles are shipped from the manufacturers with an Audio / Video RCA cable. The A/V RCA cable has three RCA plugs: a video plug (yellow) and two audio plugs (red and white). If your gaming console came with an A/V RCA cable, please follow the instructions supplied by the manufacturer for setting it up and connecting it to the TV. Please note that you must leave the red and white audio jacks on the A/V cable UNCONNECTED. Once the console is properly connected to your TV, please follow the diagram in the illustrated X Rocker Set-up guide to connect the gaming console to the X Rocker. If your gaming console was shipped with a coaxial cable, instead of an A/V RCA cable, you must follow an alternate set-up procedure (coaxial cable is the same type of cable that is used to connect a VCR to the TV). You will quickly recognize if your gaming console uses this type of cable. It connects the gaming console directly to the television and carries both the audio and video signal over a single cable. If your gaming console uses a coaxial cable, you CAN NOT connect it directly to the X Rocker. Instead, you must

Use an intermediary A/V device (such as a TV, VCR, DVD, TIVO, etc)

a. Connect your gaming console to the intermediary A/V device via the coaxial cable.
b. Connect the X Rocker to the ‘Audio Out’ jack on the intermediary A/V device.
c. Follow diagram 2 in the X Rocker Set-up guide to connect the X Rocker to the intermediary A/V device and finalize the setup.

If your gaming console is attached to an HD TV with an HDMI cable, you will need to connect the chair using either the audio out jacks on the back of the TV or by plugging into the headphone jack on the front of the TV.

–Unable to hear any sound from the X Rocker–

1. Check to ensure that the power adapter is properly connected to the power jack (A8). When properly connected, the indicator light (A9) on the control panel should light up when the power switch (A7) is turned on. If the indicator light (A9) does not light up, try to use another power outlet in your home. When the TX box is switched on (A14) for use in wireless mode, the power indicator light on it’s front panel should also light up. If the light is not on, please try changing the batteries in the TX.

2. Make sure the power unit is turned on and indicator light on the control panel is lit. If it is not, please press the power switch on the control panel. When you use wireless mode, the power indicator light on the front panel of the TX box turns green, if the light is not on, please turn on the power switch (A14) on the side. Check the BAND selector (A15) on the side of the TX box and make sure the number selected is the same as the number selected on the BAND selector (A6) of the control panel on the chair. For example, if the BAND selector on the TX box is on “1” make sure the BAND selector on the control panel is also on “1”.

3. Once you have successfully completed 1 and 2. Please review the X Rocker illustrated set-up guide. Double check all audio connections. Finally, check that the volume on the hand remote is turned to an audible level on both the TV and the chair.
