

DIRECTIONS

SPRAY TANK CLEANER is highly concentrated and effective at high dilution rates.

FOR LARGE VOLUME SPRAYERS: One quart (.95 liters) of **Spray Tank Cleaner** will treat up to 100 gallons (378 liters) of solution. One gallon (3.78 liters) will treat up to 400 gallons (1,512 liters).

Adjust the dilution rate as needed for individual conditions. Each cleaning situation will vary and adjustments will be necessary. Be certain to circulate **Spray Tank Cleaner** – treated solution through-out the spray system for 5-10 minutes. Use a high pressure sprayer or hose to rinse all interior areas and spray tank walls. Purge hoses, spray lines and nozzles for at least one minute. After cleaning, drain system and rinse all tank and spray areas, including nozzles and lines. Conduct a rinsate test by applying to sensitive vegetation and observe for 48 hours. If damage occurs, repeat cleaning process and testing procedures.

FOR HAND-HELD AND BACKPACK SPRAYERS: Use one ounce (30 ml) of **Spray Tank Cleaner** per gallon of water, agitate thoroughly, drain and follow with a clear water rinse.

BE CERTAIN TO RINSE ALL EQUIPMENT AFTER CLEANING. It is essential to rinse and to dispose of rinsate according to current local, state and/or federal regulations.

CAUTION: PROTECT FROM FREEZING

HAZARD WARNING (29CFR1910)

CAUTION: Eye irritant. Prolonged or repeated contact with skin may cause irritation. Ingestion may cause nausea, vomiting and mucosal irritation. Avoid breathing spray or mists.

FIRST AID: EYES: Immediately flush with water for 15 minutes and contact physician. **SKIN:** Wash affected areas thoroughly with soap and water. If irritation persists, seek medical attention.

Our Spray Tank Cleaner is:

1. A powerful, superior grade spray tank cleaning, rinsing and emulsifying agent designed to permeate pesticide and adjuvant residues, holding them in solution to allow for complete rinsing and system purging with ordinary water.
2. Tolerant to extremely hard water which causes spray tanks to accumulate high levels of residue (i.e. scum and mineral deposits). Spray Tank Cleaner contains ingredients that counteract hard water conditions to maximize rinsability and eliminate residue.
3. Totally soluble, unlike powdered or granular materials. No undissolved granules are left to clog nozzles or disrupt effective spraying, therefore, waste is minimized.
4. Contains effective corrosion inhibitors for a high level spray equipment maintenance program. It is compatible with all spray tank components and accessory equipment.
5. Contains large reserves of neutralizers that prepare the tank for future use.

CONDITIONS OF SALE

It is critical that this product be used and mixed only as specified on the label. Neither the manufacturer nor the seller makes any representation or warranty, expressed or implied, with respect to the results from the use of this material. Buyer and user assume all risks of use and/or handling.

Except to the extent prohibited by applicable law, the exclusive remedy of the user or buyer and the limit of liability of the Company or any other Seller for any and all losses, personal injuries or damages resulting from the use of this product shall be the purchase price paid by the user or buyer for the quantity of product involved.
