## COPENHAGEN

## CARE INSTRUCTIONS

### CLEANING:

To clean, use a soft damp cloth. Avoid harsh or abrasive cleaners or scourers.

### WARNING:

We highly recommend professional installation by someone experienced in fitting large mirrors. Mirrors are heavy and your safety relies on the strength of the wall to which they are mounted. Before drilling, check for piping and electrical cables. Use appropriate fixings for different mounting surfaces.

### For hanging the mirror, follow these steps:

- Position the mirror against the wall and mark where the first fixing should go. The wall should be flat and even.
- Drill a hole, insert a suitable rawlplug, then screw in leaving the head exposed about 1/4" inch (6mm).
- Mark the position for the second fixing, ensuring it's the same distance apart as the first, and that the holes are level.
- Lift the mirror into place, ensuring the fixing clips on the frame hook firmly over the screw heads.
- Periodically check the mirror to ensure no fittings have loosened.

**Note:** The security of all fixings depends on the strength of the wall and screws/fittings used. Seek professional advice for safe installation and appropriate fittings.

IF IN DOUBT, CONSULT A PROFESSIONAL.

### ADDITIONAL WARNINGS:

- Avoid striking the glass with hard or pointed objects.
- When cleaning, use a soft, damp cloth and dry immediately.
- Do not use wire between the fixing brackets; only use permanent screws into secure walls.
- Check the strength of the wall, especially if mounting on a partition wall, and use appropriate rawlplugs/screws.
