

LT-SMART-BELT

THE PRODUCT

With its embedded activity sensor the smart belt calculates daily calorie burn by tracking steps and sitting time. The smart belt can also be used as a smart bracelet when you are not wearing a belt.

LT-Smart Belt can also be a Wrist Watch

Colour available

FUNCTIONS

Two- way reminder-Through the App settings the user can issue the LT smart belt an alarm. When the phone is at a certain distance away from the LT smart belt and vice versa the phone will issue an alarm.

Sedentary reminder- Based on the user's sitting time, it will shock the user to remind them not to sit for too long and to get up and exercise.

Call Alert- When the user receives a call on their phone then the LT smart belt will shake as a reminder to answer the phone.

Movement Step- LT smart belt mode allows the user to record state of motion, calorie consumption and movement steps.

Ringtone- The system comes with default alarm ringtones but the user can also use their own recordings as ringtones.

STEPS TAKEN

Given the current busy work schedule and modern life, staying active with a healthy lifestyle has become a must. With LT Smart Belt's embedded pedometer, track your calorie burn by counting the steps you have taken.

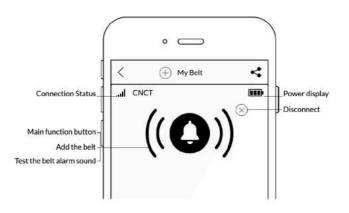

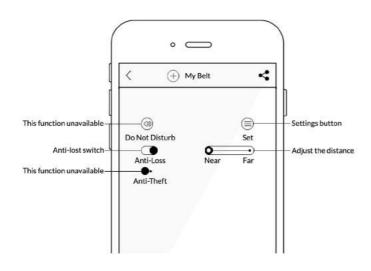

SITTING TIME

Prolonged sitting has been proven to have health risks, even with regular exercise. LT Smart Belt ensures that both your active and inactivity periods are healthy.

Ring Tone and Anti-lost Function

App Main Interface

First time users need to register
a personal account. (The app supports QQ,
WeChat and Microblogging account)
