Optimus OBD Manual

To activate your tracker, please follow these easy steps

2

- 1 Go to our website www.OptimusTracker.com
- 2 Click on the "Activate Tracker" link.
- 3 Fill out the form. You will need the IMEI number.
It's the 15-digit number that is printed on the tracker's labels.
- 4 After subscribing, wait a minute for the activation email.
Make sure to check your spam/junk folder too.

Activate before installing

When attaching the Extension Cable

3

- 1 Locate the OBD Port and plug one end of the extension cable into the vacant port and the other end into the tracker.
- 2 The cable has a pass through feature which means you can plug another OBD device in without disconnecting the device.
- 3 The lights on the GPS tracker have been disabled so keep in mind you will not see them turn on when you connect the tracker.
- 4 You must activate the GPS Tracker online before installation. The GPS Tracker's Sim Card may be blocked permanently by the cellular provider if the device is connected for several days without an active subscription.

OBD II Port locations are different depending on the type of vehicle. Above are the most common locations.

Extension Cable included

Keep in Mind

4

When no cellular signal is available the tracking unit will save the track in its memory until it regains signal. GPS signal may not be acquired if the car is parked indoors. To avoid any compatibility issues or problems with your car, this tracker will only use the OBD port of your car to power the tracking unit.

**This tracker will not read your car's OBD data.*

Locate the OBD port inside your car
