## ALTERNATE BATTERY OPTIONS

There are a lot of 12V power stations on the market. For Topside Heated Blanket™ and Flipside Heated Bed Cover™ we ideally recommend a minimum battery capacity of 500Wh w/ 4A output (40W), and for Backside Heated Seat Pads™ a minimum of 70Wh w/ 2A output (24W). Please contact the battery manufacturers for more information about battery capacity, dimensions, and other specifications. Here are a few links to some brands that we feel will work well with our products.
