

CHECKLIST OUTDOOR CLEANING

Patio + Balcony

- Start by sweeping away dirt, dust, and spider webs from walls and windows with a broom. Use a hand brush for raw materials such as bricks.
- Wash everything down with water.
- Use universal cleaner in a spray bottle or bucket to remove more resistant dirt from all surfaces such as windowsills, doors and railing.
- Dry off with a dishcloth that's been wrung out.
- Wash windows
- Wash the floors. If you have wood paneling or flooring, check if they need any special care like staining.
- Take out your outdoor furniture and use the brush to remove spider webs etc.
- Hose the furniture down and use the universal cleaner mix to wipe them over, if they tolerate water.
- Dry them off and bring out cushions, blankets, lanterns and other cozy items.

Greenhouse

- Start by removing as much as possible from inside the greenhouse. This allows you to take a broom and sweep walls, corners and furniture for spider webs, dust etc.'
- Use a bucket with universal cleaner to wipe off walls and other surfaces
- Wash the windows on the inside and the outside
- If there's grime that's extra hard to remove, try swapping out universal cleaner in with grime remover.
- If need be, hose the greenhouse down one last time-
- When it's dry, replace the interior and add decorative, cozy elements.

Garden

- Remove weeds and dead plants.
- Use a hand brush to scrub stepping stones, statues or other decorations in the garden, to remove moss and dirt.
- Trim trees and bushes
- Use a dust pan and hand broom to remove the loose dirt and leaves that have ended up on the patio, after everything has been removed, trimmed or replanted.
- Reuse old pots or find new ones in colors, so you can plant your favorite outdoor plant.
- Use Instagram or Pinterest to find inspiration for styling your garden
