Maintenance and safety

Camera

1. Keeping the lens clean can help you take clear, clear photos at the most likely focal length. Gently wipe the prints and dust on the lens and LCD screen with a dry, soft gauze.
2. Wipe the surface of the camera with a clean, dry cloth. Do not use a rough cloth that will scratch the surface of the camera.
3. Don't put the camera in high heat for a long time or in a very warm environment (such as tool bags, suitcases, etc.)

Memory card

1. To ensure best functionality, please use branded high quality Micro SD card.
2. To avoid data loss, do not expose the card to high heat, humidity, or static electricity.
3. Format the memory card before using.

Security prevention

- a. In order to avoid the danger of electric shock. Do not open the camera or repair it yourself.
- b. Keep the camera dry. Do not expose the camera to excessively humid conditions that may cause camera malfunction.
- c. If moisture enters the camera, stop using it immediately. It must be completely dry in the air before reusing the camera.
