# X15 True 4K
Ultra HD Action Camera

CamPark®

# Accessories Introduction

Precaution

- Thank you for choosing Campark X15 camera. Please carefully read the manual before using, and keep it at a safe place for future reference.

- The compilation of the user manual refers to the latest information. The manual quotes captured screen displays and graphics, with the aim to introduce the digital camera through detailed and direct methods. Due to system update and product batch, those captured screen displays and graphics indicated in the manual may differ from the actual camera you received.

Camera Maintenance

- When you are not using the camera for some time, please keep it in a dry place and avoid direct sun light.

- Use protective cases to avoid the scratches on lens and screen.

- Please clean the lens with soft clothes or tissue, DO NOT use organic solvent to clean the lens.

- DO NOT touch the lens with your fingers or other hard subjects.

- Please put the camera in the waterproof case when using in moist or dusty place, in case of any leakage.
- Avoid dropping or bumping the camera.
- DO NOT use the camera in high temperature environment for a long time.
- The camera will get warmer while working, that is normal.
- Please do not put heavy objects onto the screen. It may scratch or crush the screen.

Featured Function

Loop Video

Loop Video is not available under 4K or 2.7K resolution.

With loop video on, the camera will keep recording video in 10 minutes footage, and loop back to the earliest footage when memory card fills up.

Time Lapse

Time Lapse is not available under 4K or 2.7K resolution.

Under Time Lapse Video Mode, you can directly record time lapse video with adjustable frame gap.

Screen Saver

With screen saver on, after the camera is idle for preset time, the camera will automatically turn off screen display to save power.

WiFi Connection and APP

1. The X15 camera has built-in WiFi function, you can connect it to your smart phone and remotely control the camera and share the recorded moments.
2. Before using WIFI function, please install "iSmart DV" APP on your smart phone.
3. You can search "iSmart DV" in Google Play Store / Apple APP Store, or you can scan the QR code below to get the APP.

Android App Download

IOS App Download

How to Connect :

1.Power on the camera, and the camera will enter video recording mode automatically, Press and hold the "Down" button to turn on WiFi on the camera, and you can see the WIFi information on screen.

NOTE:
The hotspot of the camera is named "Campark X15 ", and the default password is "1234567890".

2. Turn on the WiFi on your smartphone, find the camera hotspot and connect to it.
3. After successful connection, open the "iSmart DV" APP on your smart phone,and choose to connect the camera, then you will enter live view and control panel.
4. With the APP, you can use your smartphone to remotely control the camera, download the recorded files, and change the settings.

Relative humidity	5% ~ 95% (No frost)

Common Problems and Solutions:

Q: The camera can not turn on.

A:

First, check the battery status, charge the battery before using the camera.

Try to connect a DC 5V/2A external power supply, the camera is designed to be able to work on external power supply.

Q: The camera crashes during using.

A:

If this happens occasionally, it's largely due to the working environment or practices that the camera is being used in.

If this happens very frequently, please check the memory card speed, the X15 camera records UHD video, it requires high speed memory card, make sure you are using C10 or above high speed memory card.

Q: The camera is warming during normal use

A:

The X15 camera process very high volume data during recording,the main chipset will generate certain heat, and the camera is relatively sealed, it will have certain amount of heat during use.
Temperature of 10~20℃ above room temperature is to be expected.

Q: Video playback is not smooth, video is blurred / Red and blue stripes.

A:

Make sure it's using a high quality Class 10 or above memory card. The recommended capacity is over 8 GB. Format the memory card on the camera before using.
