NUROLIGHT[®]

Nisarga Biotech Pvt. Ltd., India. Nisarga has perfected SCO₂ Fluid Extraction (SFE) technology and even invented new ways to use these powerful extracts.

Organic Farms to Finished Product

We have a massive raw material resource that comes from a local farmer cooperative as well as our own farms, all certified organic by Ecocert and all under contract to supply us with quality raw material.

Science Behind NuroLight

Through Nisarga's connection to Dr. Shrikrishna Phadke, a second generation formulator, doctor, and instructor of Ayurveda with experience of over 40 years, Nisarga is offering a patented herbal blend to support normal neurological functions such as memory, focus and attention. NuroLight is the crowning achievement in herbal supplementation that combines the latest in herbal extraction technology with the most ancient medical system on the planet. This latest branded ingredient is a clinically researched blend that has performed well against stimulant medication and has completed phase one and two clinical trials, for over two years.*

NuroLight Patented Blend[†]

Flax Seed Extract (50% Linolenic Acid)

Celastrus Paniculatus Extract (9% Linolenic Acid)

Bacopa Leaf Extract (20% Bacosides)

Rosemary Leaf Extract (6% Carnosic Acid)

Ginger Rhizome Extract (30% Gingerols) (10% Zingiberene)

†Supercritical CO₂ extracts

Dosage Used in Clinical Trials

Higher Dosage of 600mg NuroLight per day showed best results.

Clinical Trials Outcome

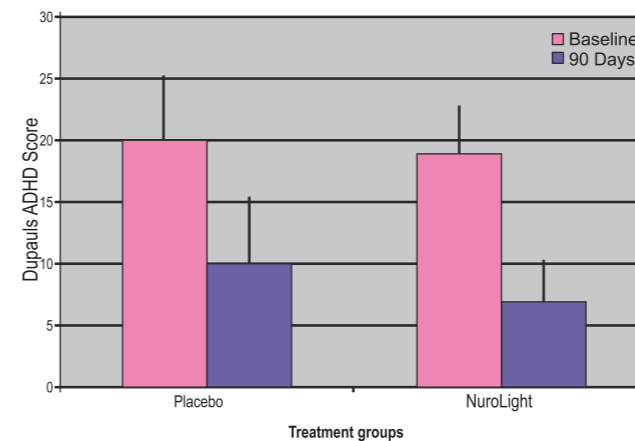

Following two pages give snapshots of the clinical outcome / findings.

Graphic for Trial - I

Figure 1

Comparison of efficacy between NuroLight[™] & Placebo using Dupauls Rating score*

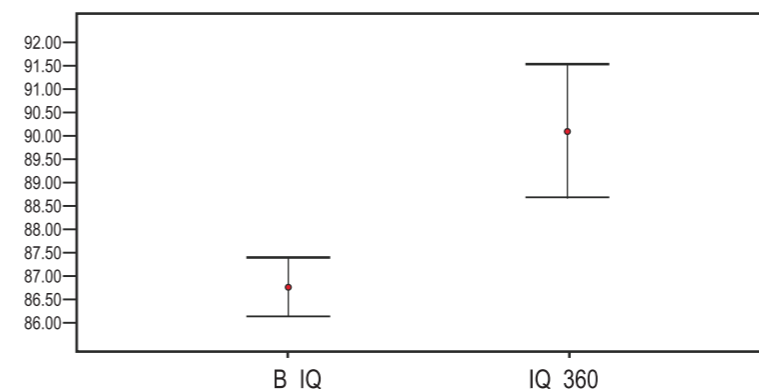

Time point	Dupaul's ADHD score		Significance Level (Group A Vs Group B)	Significance
	Group A (Placebo) (n=39)	Group B (NuroLight) (n=32)		
Baseline	19.84 ± 5.28	18.88 ± 3.81	0.39	NS
90 days	9.86 ± 5.45	6.96 ± 3.54	0.01	HS

Group B taking NuroLight showed highly significant improvement in attention & reduced hyper activity compared to placebo*

Figure 3

IQ Analysis : Box plot showing Mean IQ score (with 95% CI) at Baseline and 360 days *

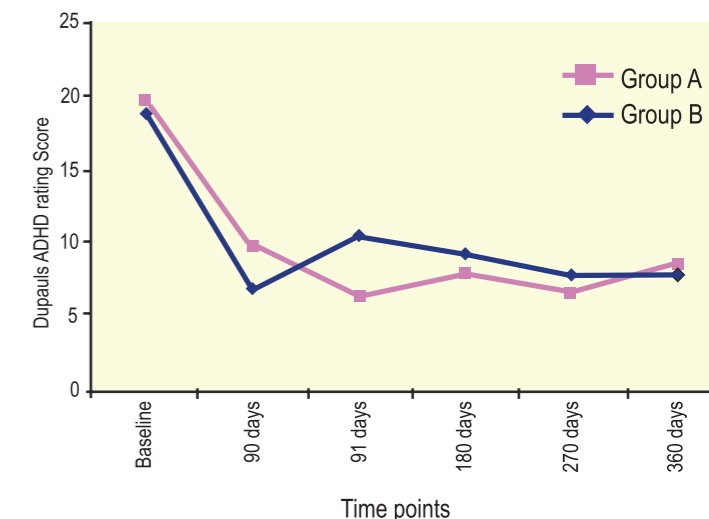

The graph shows the difference in range of IQ at baseline (0 day) and at the end of phase III (360th day). From the graph, it is clear that the lowest value of IQ score at 360th day is higher than the highest value at 0th day. The range at baseline is: 86.25 – 87.50 and that at the end of phase III is 88.75 – 91.50*

Figure 2

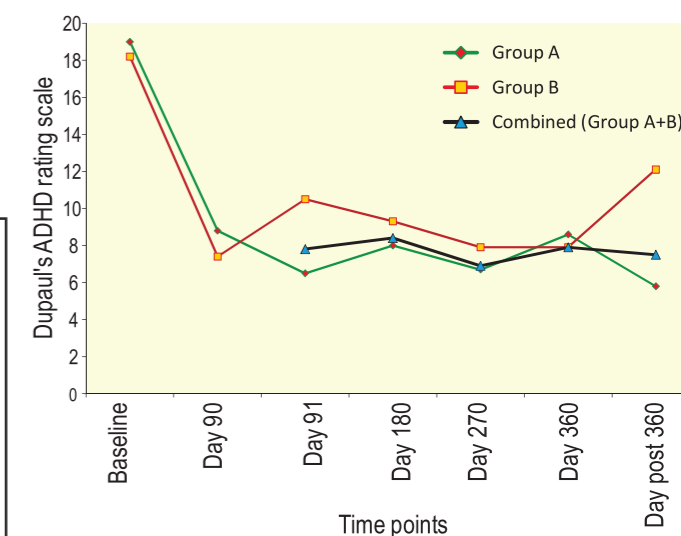

Comparison of efficacy using Dupauls Rating score *

Both low & high dose of NuroLight showed continual improvement in Dupauls Rating Score after cross over for all subjects.*

Figure 4

Persistence of clinical effect of NuroLight[™] in ADHD patients

Group A : Placebo until 90 days and crossed over to higher dose from 91st day.*

Group B : NuroLight low dose throughout the trial *

Group A does not show any increase in hyperactivity or in inattention even after stopping the use of NuroLight after 1 year*
