

REMA FLAT BLADE CONTACT CONNECTORS SR50 · SR175 · SR350

Productfeatures and advantages

- Reliable power connection solution for
 - > Electric vehicle batteries
 - > Battery chargers
 - > Forklift trucks
 - > Other DC voltage applications
- Operating voltage determined by housing color> Simplifies mating of same voltages
- Plug and socket with identical housing design
 - > Reduces quantity of components
 - > Reduces purchasing and storage cost
- Acid resistant housing material
- Handels and strain relieves available
- CE Marking & UL recognized
- Contacts sized for AWG (American Wire Gauge)
- REMA developed high-grade contacts made out of pure high conductive Cu-ETP copper with silver plated surface and an anti-friction and tarnish coating ensure > power transition with minimal losses
 - > long life
 - > suitable for crimping

3. TEMPERATURE RISE CHARTS

SR50

REMA® SR50 SR50 connector system is designed for optimum performance when used with 8 AWG cross section cable. The rated operating current is 50 A.

Depending on the cross section and the laying procedure, the current rating is changed.

These following temperature rise curves are for reference.

The actual thermal performance may vary depending upon environmental conditions.

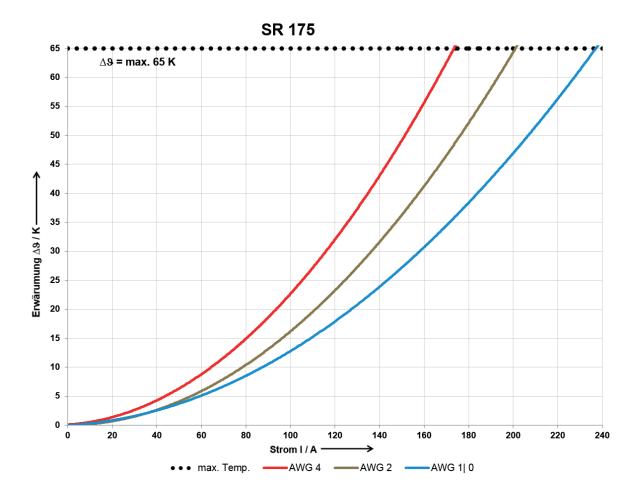

Please contact REMA for additional information concerning the SR50.

SR175

REMA® SR175 connector system is designed for optimum performance when used with 1/0 AWG cross section cable. The rated operating current is 175 A.

Depending on the cross section and the laying procedure, the current rating is changed.

These temperature rise curves are for reference.

The actual thermal performance may vary depending upon environmental conditions.

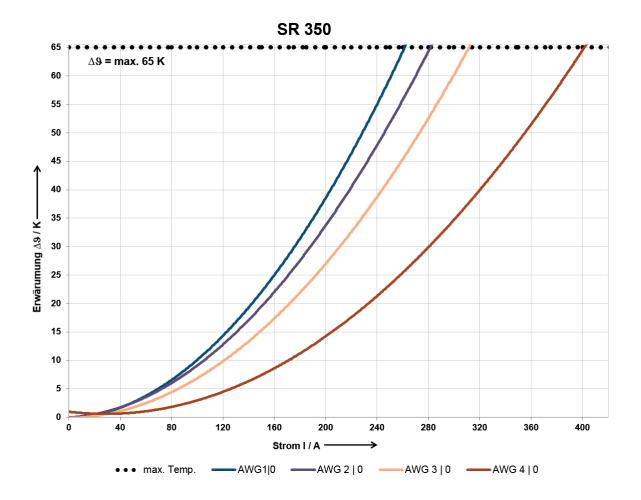

Please contact REMA for additional information concerning the SR175.

SR350

REMA® SR350 connector system is designed for optimum performance when used with 4/0 AWG cross section cable. The rated operating current is 350 A.

Depending on the cross section and the laying procedure, the current rating is changed.

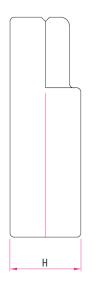

These temperature rise curves are for reference.

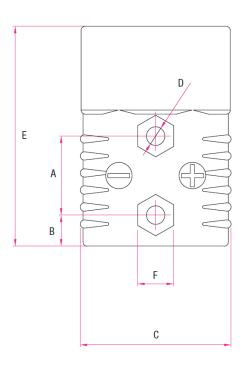

The actual thermal performance may vary depending upon environmental conditions.

Please contact REMA for additional information concerning the SR350.

5. GENERAL PROCESSING INFORMATION SR50 · SR175 · SR350

Installation of contacts and connector by a qualified electrician in accordance with national and local electrical codes and the following instruction only. Crimp contact to the cables according to the 's assembly instructions.

The following instructions serve as a reference.

1.Strip wire

- > Select the correct strip length from table 1.
- > Do not cut into cable strands!

2. Crimpverbindung an den Kabel

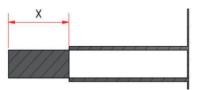

- > Select contact from table 1.
- > Use only suitable die sets!

3. Insert the wired contact into the rear of the hosing according to picture 2

- > Make sure that the smooth contour of the contact is upwards so that the contact underside moves over the housing spring (picture 2) and is retained with an audible click.
- > To check engagement, pull gently on the cable to make sure contact. is correctly locked over the housing spring.

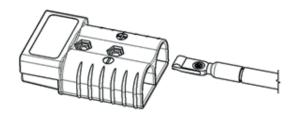

Table 1: Overview Table

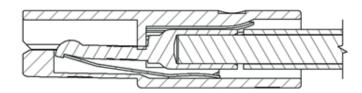

TYPE	Contact Part-No.	Wire Size AWG or mm²	"X" in mm acc. pic. 1	X" in inches acc. pic. 1
>SR50	109356	10/12 AWG	13,5	0,53
>SR50	109358	8 AWG	12,5	0,49
>SR50	109354	6 AWG	12	0,47
>SR175	109360	4 AWG	26	1,02
>SR175	109364	2 AWG	26,5	1,02
>SR175	109363	1/0 AWG	26	1,04
>SR350	109368	1/0 AWG	30,5	1,2
>SR350	109371	2/0 AWG	30,5	1,2
>SR350	102752	3/0 AWG	33	1,29
> SR350	102753	4/0 AWG	33	1,29

Picture1: Strip length

Picture 2: Assembly of wired contact into housing

Picture 3: Installed contact into housing

Disassembly

- Switch off power the contact according to DIN EN 60079-14 when dis-assembling the contact.
- Remove contact by pressing the spring at the front of the connector with a small insulated screwdriver. Simultaneous while pressing the spring, pull gently on the cable to remove the contact from the housing.

SAFETY NOTE

Lay the cables free of tension!
In torsional and / or tensile forces in the cable using the cable clamp
REMA SR is recommended

SR50 Part-No.: 104756 SR175 Part-No.: 102719 SR350 Part-No.: 102723

6. DIE SETS

General processing information

- Please only use suitable REMA die sets. Only those guarantee a secure electrical connection.
- Please actuate die sets always until the end.
- Only process contacts with clean sleeves. The contaminated crimpsleeves increase the contact resistance and may lead to overheating.
- Please always set the die sets centred on the crimp sleeves.

Hydraulic tool pliers set HP60 Type H60 - Die Sets

Indent crimping press area 6 – 70 mm²

Set Part-No. 107138

Douple indent crimping press area 16 – 70 mm²

Set Part-No. 113032

Typ C130 - die sets

- Indent crimping press area 10 95 mm²
- Souple indent crimping press area 10 240 mm²

For further questions, please contact your REMA Sales department.
