

## Submersible Dewatering Pumps - KRS slurry

The KRS-series of slurry-handling type is a submersible three-phase cast iron slurry pump. It is equipped with a high-chromium cast iron agitator that assists smooth suction of the settled matters. The other wear parts such as the impeller and the suction plate are also made of high-chromium cast iron for extra durability. The top discharge, side flow design assures efficient motor cooling even when it operates with its motor exposed to air. **Also, The KRS-200 was added to the series a while ago. This is the largest sized model in KRS slurry series and has an adjustable suction plate which is the same as the one for our GPN series.**

### Performance Curves

Series	KRS slurry
Discharge Bore (mm)	80 - 200
Phase	3
Model Output (kW)	4 - 18
Pole	4
Protection Device	Circle Thermal Protector
