

TE3-YDV

CENTRIFUGAL - SITE WATER

TE3-YDV are self-priming, centrifugal pumps manufactured by Tsurumi and powered by Yanmar stage 5 diesel, recoil start, engines.

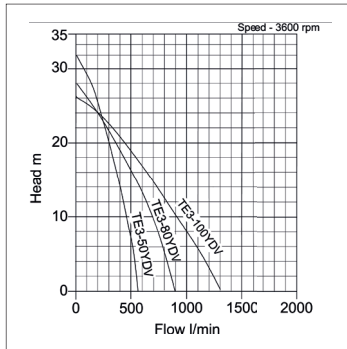

All models have rubber mounts for engine vibration control and have easy-carry frames, but a two wheeled trolley is available as an optional extra. Fitted with long run 13 ltr fuel tank, with a fuel level gauge.

Capable of pumping large volumes of clean and dirty water they are good for site drainage, land drainage, transfer and flood defence.

Operating conditions: Maximum recommended suction lift: 6 mtrs

Fluid: Clean water | Dirty water

Application: Hire fleets | Construction | Utilities | Drainage | Transfer | Flood defence

TE3-YDV	Type	Fuel	Starting
	Centrifugal	Diesel	Recoil

Pump	Inlet & outlet	Pump body	Volute
	Cast aluminium	Grey cast iron	Grey cast iron
	Impeller	Mechanical seal	
	Grey cast iron	Carbon ceramic	

Handling & Hose fittings	Frame	Trolley (optional)
	Tubular steel	Tubular steel & solid rubber wheels
	Included fittings	
	hose couplings, sealing washers, hose clips & strainer	

TE3-YDV with trolley
