

HYDROSACK • HYDROSLAKE

SANDBAG ALTERNATIVES

The **HydroSnake** and **HydroSack** are a clean, easy to store and fit alternative to sandbags for low level flooding. They are constructed from a non-woven outer material with a super absorbent core. Before use, each one weighs less than 500g but once in contact with water it can weigh up to 20kgs when full to capacity of 20 litres. In this condition, it becomes effective in defending and redirecting floods and excess water. With contents of eco-friendly super-absorbent polymer and pulp, they are easily disposed of after use into the ground or for incineration.

The **HydroSnake** covers 120cm when activated, making the ideal barrier for low level flooding by doors, gates, shutters, passages etc. 2 per pack, each one measures 145cm x 25cm.

HydroSnake

The **HydroSack** covers 40cm when activated and is the design also includes handles for minimal contact and easy positioning of the barrier making it the perfect replacement of the traditional sandbag. 2 per pack, each one measures 60cm x 48cm.

HydroSack

item code	description
12-35-1002	Hydrosnake - 1 pack (2 snakes)
12-35-1003	Hydrosnake - 12 packs (24 snakes)
12-35-1000	HydroSack - 1 pack (2 sacks)
12-35-1001	HydroSack- 12 packs (24 sacks)
