### **Instant Mold Directions:**

- Pour hot water at about 170 degrees on to Instant Mold. Wait 2 minutes until the putty becomes soft.
- Using a tool, remove the putty from the water and wipe off the excess moisture.
- Press Instant Mold firmly on the part you wish to duplicate.
- Allow to cool and harden. Carefully remove the master part from the Instant Mold. You can now use Kneadatite (Green Stuff), Stick Putty or other modeling materials to create duplicates of your part. Do not use materials that require heat for curing (or which generate heat when curing) or the Instant Mold will deform.
- To recycle Instant Mold, just add hot water and start all over again!

Museum Services Corporation urges each customer or recipient of this informational sheet to study it carefully and consult appropriate expertise, as necessary or appropriate, to become aware of and understand the data contained in this informational sheet and any hazards associated with the product. The information herein is provided in good faith and believed to be accurate as of the sources shown above. However, no warranty, express or implied, is given. It is the buyer's/user's responsibility to ensure that their activities comply with all federal, state, provincial or local laws. The information presented here pertains only to the product as shipped. Since conditions for use of the product are not under the control of the manufacturer, it is the buyer's/user's duty to determine the conditions necessary for the safe use of this product. Due to the proliferation of sources for information such as manufacturer specific information sheets, we are not and cannot be responsible for information sheets obtained from any other sources. If you have obtained an information sheet from another source or if you are not sure that the information sheet you have is current, please contact us for the most current version.
