Info on Maimeri Restoration Colors

Maimeri colors are made of the purest and finest pigments and mastic resin, and carefully and thoroughly ground in turpentine with the total exclusion of oils.

Maimeri colors are quick drying and when used without additives, produce a moderately matte surface. Because they are free of all oils, they do not change tone once dried and are always soluble with petroleum spirits.

Notes from conservators

If you are planning to use Soluvar varnish, you must use an isolating varnish first as the Maimeri colors dissolve in Soluvar alone.

Turpentine, acetone or alcohol can be used as thinners, depending on effect desired. i.e. translucent, opaque, more matte, etc.

Museum Services Corporation urges each customer or recipient of this informational sheet to study it carefully and consult appropriate expertise, as necessary or appropriate, to become aware of and understand the data contained in this informational sheet and any hazards associated with the product. The information herein is provided in good faith and believed to be accurate as of the sources shown above. However, no warranty, express or implied, is given. It is the buyer's/user's responsibility to ensure that their activities comply with all federal, state, provincial or local laws. The information presented here pertains only to the product as shipped. Since conditions for use of the product are not under the control of the manufacturer, it is the buyer's/user's duty to determine the conditions necessary for the safe use of this product. Due to the proliferation of sources for information such as manufacturer specific information sheets, we are not and cannot be responsible for information sheets obtained from any other sources. If you have obtained an information sheet from another source or if you are not sure that the information sheet you have is current, please contact us for the most current version.
