SUCTION CUP ACCESSORY KIT INSTRUCTIONS

JACKSONSUPPLIES

Suction Cups go on
the side of the supports

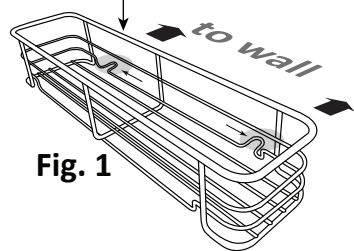

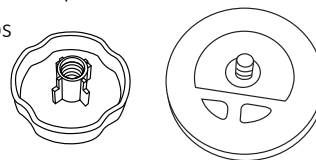

Fig. 1

Step 1. Ensure the surface where the product will be mounted is completely clean and dry

Step 2. Make sure to install the suction cups in the correct direction (see Fig. 1)

Step 3. Disassemble the suction cups

Step 4. Align the **suction cups A** with the basket at the desired location (see Fig. 2). Then tighten the suction cups with **plastic knob B** by turning clockwise.

CAUTION: Suction cup will not adhere to grout lines or porous surface.

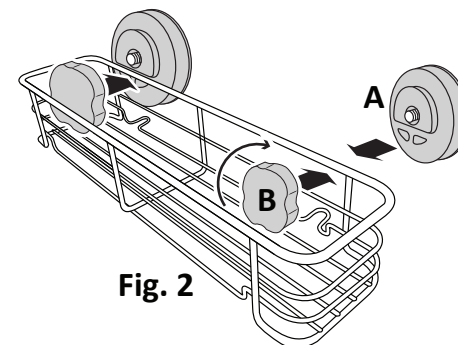

Fig. 2

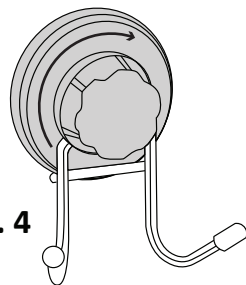

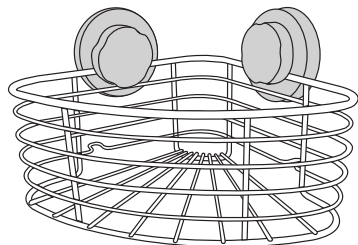

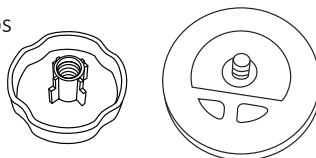

Fig. 4

Step 1. Ensure the surface where the product will be mounted is completely clean and dry

Step 2. Disassemble the suction cups

Step 3. Align the **suction cups A** with the basket at the desired location (see Fig. 3). Then tighten the suction cups with **plastic knob B** by turning clockwise.

CAUTION: Suction cup will not adhere to grout lines or porous surface.

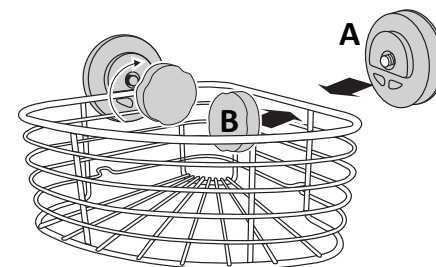

Fig. 3

Step 1. Tighten the suction cup by turning clockwise to stabilize the hook (see Fig. 4)
