- ✔ Simple, affordable, reliable
- ✔ Fits 95% of skimmer boxes

Simple, affordable, reliable

Garden Flip 'n' Fill

Permanent Flip 'n' Fill

At best, filling the water in your pool is a chore and can lead to an overflow when you forget about the hose. At worst, the pump and equipment can be damaged if you forget to fill to the pool. Don't leave your pool equipment to chance. Install the Flip 'n' Fill automatic leveller to protect your pool equipment the easy and affordable way.

The Flip 'n' Fill sits discretely beneath a skimmer box lid to monitor the water level in your pool and restore it to the correct height. Water is supplied to the Garden model via a standard garden hose while the Permanent model is connected with 8mm PVC tubing.

The Flip 'n' Fill is available in three stylish colours to suit the deck area around your pool:

- Tan
- Sandstone
- White

The Flip 'n' Fill sits neatly into more than 95% of all Australian skimmer boxes. Simply attach one of the three adaptor rings included within the kit to find the best fit for your pool.
