

# Fire Hose Kit

NEW

## Be Fire Ready

Inside Diameter	Mass per Metre	Minimum Burst Pressure	Recommended Working Pressure	20m Coil Diameter
25 mm	0.16 kg	5250 kPa	2100 kPa	0.28 m
38 mm	0.23 kg	5250 kPa	2100 kPa	0.32 m

### Features:

- ✓ Easy to handle
- ✓ High pressure
- ✓ Complete with couplings and nozzle
- ✓ Percolation option
- ✓ 12-month warranty

Crusader Hose have used all their years of experience in manufacturing fire hose for the brigades to also come up with fire hose for rural property owners. We understand the risk of not having fire protection in bush fire prone areas and have prepared a Fire Hose Kit for use with fire pumps.

The Excalibur hose we use in our kit is easy to handle so that many members of a family or group can use this hose to protect their lives and property. It comes with a factory fitted couplings which are securely attached so it can handle the high pressure of your fire pump. There is also a nozzle connected so as soon as you get your pump going, water will be spraying onto the fire.

The **Fire Hose Kit** comes with options for a non-percolating hose or with percolating hose:

- **Excalibur®** - non-percolating
- **Sabre®** - percolating

All **Fire Hose Kits** come in standard 20m (or 30m) lengths with crimped BSP fittings plus shut off nozzle. The coupling connects directly to your fire pump and so is ideal for quick deployment in times of an emergency.

Crimped Coupling & Nozzle

**Crusader Hose Pty Ltd**
