GRISWOLD CATTLE

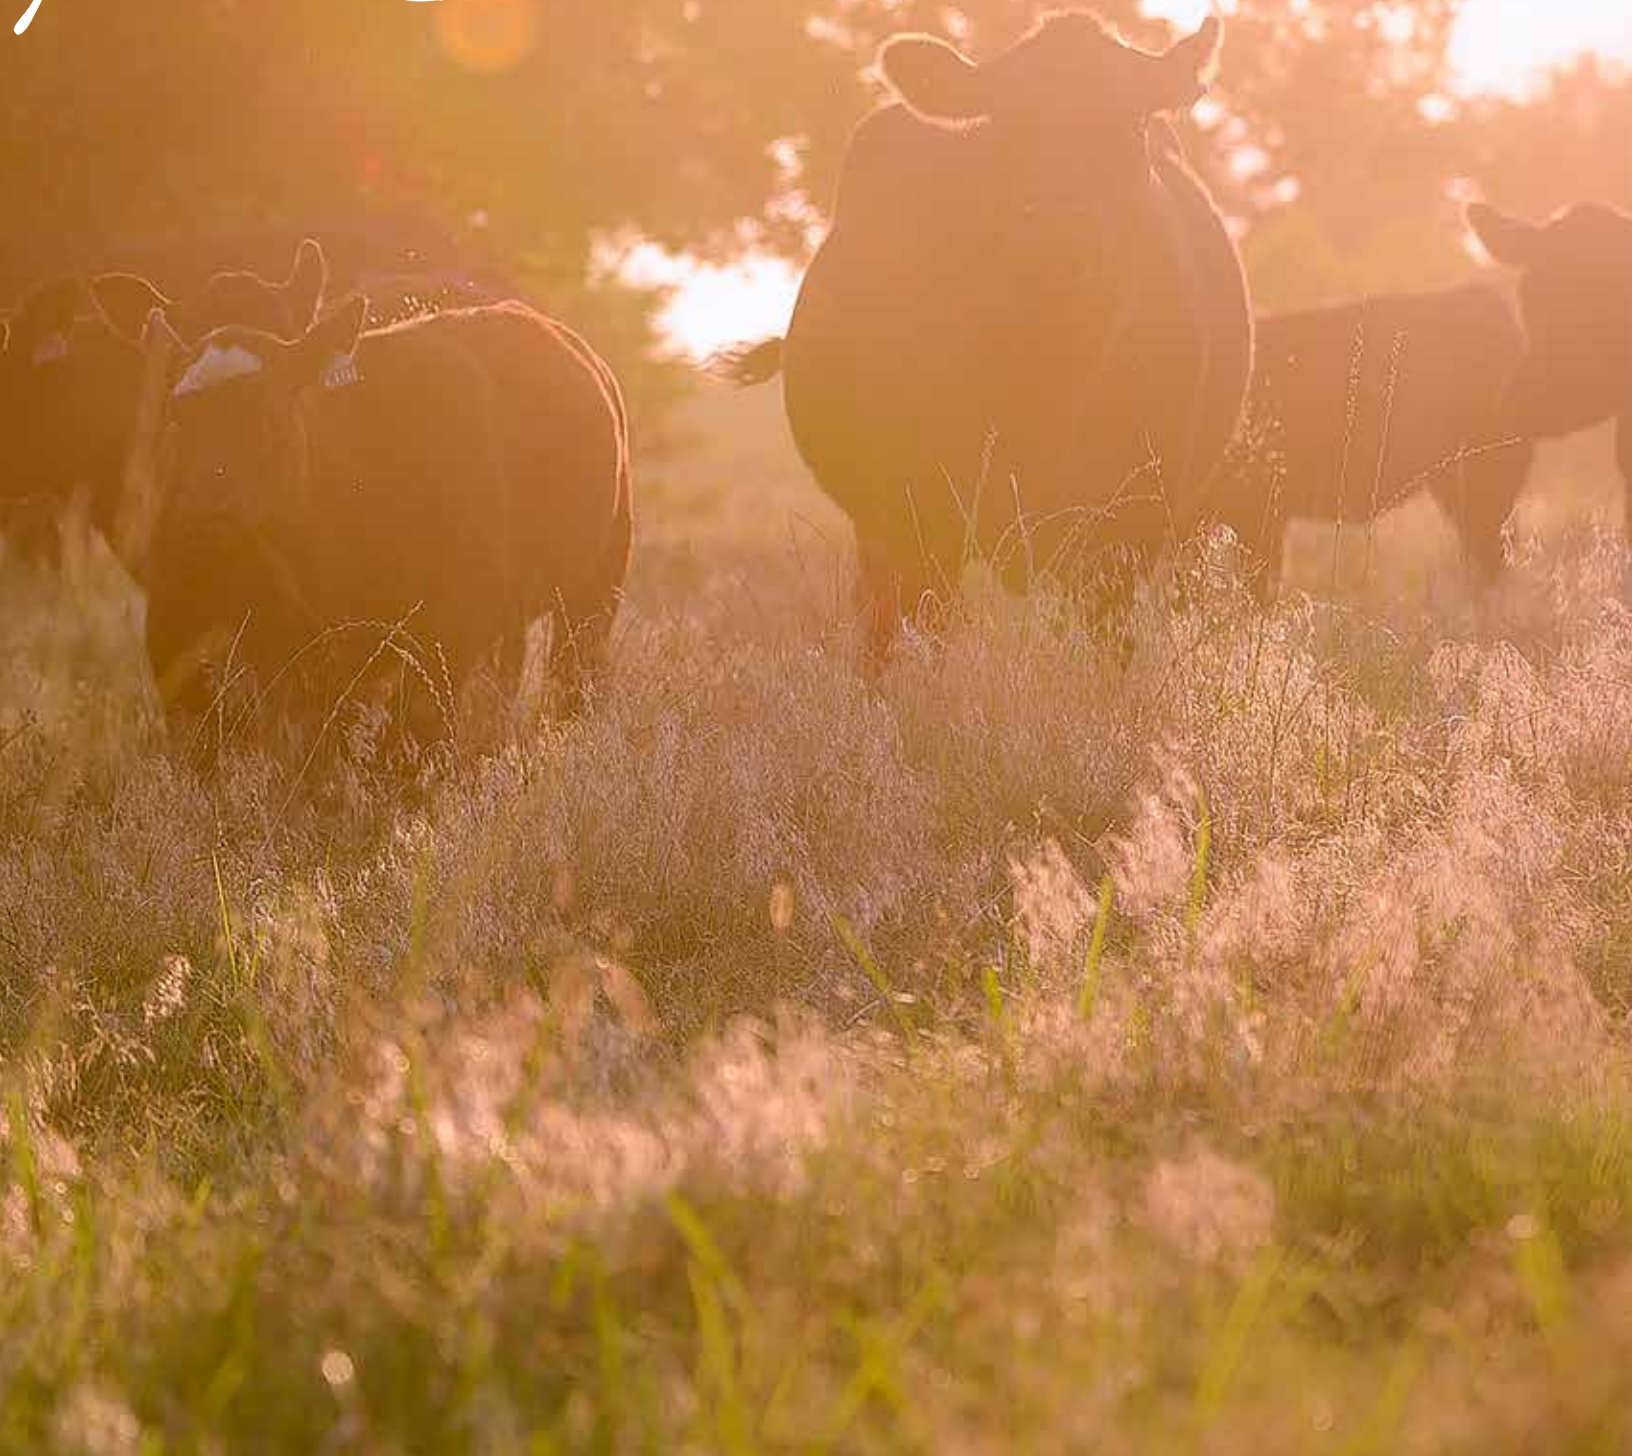

s i r e d i r e c t o r y

Alm

Raising

Without AI we could never utilize the full potential of our cow base. Huge pastures, breeding out of the back of the trailer, early mornings at 4:00 AM and late nights. String lights run by a generator and plenty of miles between point A and point B. Most of us don't have perfect set ups to breed, that said a couple panels, maybe a corral, someplace to plug in your water, it doesn't matter if it's a cigarette lighter in your truck, it's doable, we know it because we do it. AI will change your program faster than anything else you can do.

WE SHIP SEMEN EVERYDAY. ORDER ON-LINE OR CALL THE OFFICE.

We made as big of an investment next to a few of the bulls in this book as we ever have in our Griswold Genetics business. We know what it's like to wait on semen when you have a set of cows set up and not be able to get a tank. We have purchased a large number of tanks this year and will try our best to keep ahead of orders. We ship tanks all over the United States and will keep the shipping as reasonable as possible. Either order on-line or call Macee in the office at 405-372-3300 and we will get a tank packed and ready to head your way.

GRISWOLD CATTLE THE TRUSTED BRAND

We are a real family, we take real investments, in real cattle that we believe in. There is no huge company standing behind us, no backup plan. We ranch just like you, cattle are our life. These genetics, they have to work, if they don't you fail and we fail with you. Our day in and day outs are based in the pasture, we have long days sorting, branding, putting up hay, and we know the long nights of breeding in the headlights, a backwards calf, and that dirty dozen that won't drop the last calves so you can go to sleep. We have survived bouts of scours, had sales that didn't go as planned, and wondered what we would do when the haystacks ran out. We pray for rain, and plant the crops with the faith that they will come, just like you. Griswold Cattle is a real family, when you buy semen from us you buy into our dream that we are all in this together and together we can all reach the top.

If there is one thing we do at Griswold Cattle it is diversify. We love those good made, good looking females, but we realize it takes effort to get them. Through the years we have bought different set's of cattle, bred them, changed them, and turned for a new opportunity. We've ran stockers, we've retained ownership on our calves and fed them through, we sell bulls and try to sell a few high dollar females, if there is a sector of the industry we have seen it, tried it, and lived it. There has been a lot of water under the bridge, a lot of miles, and whole lot of change and growth.

Growth doesn't come from comfort zones, it takes struggle, and it takes work, to grow, and then to maintain. This set of bulls are ones we have hand selected, cattle that are above everything else, FUNCTIONAL. We want you to make a profit, we price every bull in this book as realistic as we can so every one of you can use them. I come from a long line of cattlemen but when I started on my own I had 13 head of cows and some big dreams. The right genetics and keeping consistency one cow at a time can build ANYONES program. Good cattle are available to everyone, it just takes work. The thing I love the most about all these bulls is that it allows everyone of you with the hope of making your program better to use a straw of semen and have some of the top high dollar genetics of proven producers available to YOU, we don't hold them back, we buy them to make our program better and we buy them to make YOUR program better. We always say we are all in this together, we mean it.

John

The first calf crop of Bet on Red turned out to be a major success across the country. He made sale toppers and show winners but the biggest accomplishment he made was solid, consistently good cattle. Four shots of the 8543U line up two on top, two on bottom to create as unique of line-breeding result to as great of a cow as you could possibly make. We've seen it done in the Angus world with Ohlde genetics and you know the potency of one shot of that, seldom have I seen it done in the Simmy world and especially not on a female like her.

Buying any high dollar bull is a gamble, you make a calculated risk. Bet on Red was worth it, the calves are amazing. They have his look and many carry those goggle eyes that you can't help but love. It's easy to say there has never been a red bull before him that has produced like he has. We used him heavy across the spectrum and they are the kind of cattle that work!

The power of Boots

Genoa is where we bank, it's who we trust

certain people and cattle have played a huge roll in getting us to where we are.

done in terms of genetic improvement within the Simmental industry, and you simply can't find a hole. The two best cows in the Simmental breed are wrapped up in his pedigree. Udder structure, rib, pelvic width, dimension, and just the flat out front pasture kind. We bank at Genoa, Nebraska. It's where we trust our money, and that says a lot about his name.

His brothers are on these pages, his sisters are in the show runs and donor pens. This is a line of cattle that are consistently as good as we have ever had the privilege to own. Take the time to seek out the pedigree's that make good ones time and again, it carries down through the generations and proves to profitable.

Genoa is homozygous polled and homozygous good.. We have been excited about him since he hit the ground. This is the only embryo that took of the Bet on Red x "Boots" mating, and there are no more of them in the tank. The genetic potential of consistency, design, power, and poise line up the stars in this mating. Take the time to watch him move...he fills in his step, and phenotypically you cannot make one any better. Then sit down and look at what both cow families top and bottom have

Lover Boy is a bull that is proving time and again that he isn't only going to calve easy, but he's going to make the kind of cattle that hit your replacement pen, turn out his sons as herd bulls, and make future donors. Good cattle make good cattle and he is no exception.

There have been high sellers but the thing we like the most is the fact they are all sellable. You will not find a bottom end that goes to the cull pen, the bulls stay bulls and the females go straight to the replacement pen.

His genetic profile is one you can't help but appreciate, the cow side is as good as it gets! These are good uddered, good footed, solid made, good cattle. They have stood as supreme champions in more shows than one and they will stand in the donor pens.

It is refreshing to have a calving ease bull with this much quality. You have all seen the top donors in many programs flushed to Lover Boy, he's more than a calving ease sire. Don't just breed for calving ease, breed for quality.

He raised a \$95,000 dollar bull this past year and multiple females and bulls that were sale highlights.

Supreme Champion Heifer at Cattlemen's Congress for Sara Sullivan. Sired by Lover Boy.

The Phillips family isn't new to the Simmental breed, they are known for solid cattle with cow families that are generations deep. You know where I'm going with this. Cow power is stamped in the pedigree and pasture. They are real cowmen that know it takes more than a banner to call one good! That said Private Stock has seen his fair share of purple.

Private Stock is big footed all the way around, no funky toes. Big scrotaled, for those in this business for the long run you know how important that is. His granddam and dam are good uddered, productive females that keep their flesh and have the eye appeal, dimension, and look that demands a premium. Every female on the bottom side for generations has worn purple under the bright lights from Louisville to Denver. They make cattlemen's cattle. Read that again, they aren't just fluff females that win shows, they are the kind that you want to replicate.

We have been calving heavy to Private Stock, the calves come easy and have quality the whole way through.

Use with caution on heifers.

We always said if we ever got in the number bull business they had to be a good bull first and numbers second. We have never put focus on numbers we have always paid attention to the things that make cattlemen money upfront. John is in the phase of life where he wakes up at four and can't sleep, I haven't got to that phase yet but he wakes me up to tell me what he's found. Four AM is his time to look at all the catalogs and papers. He ran across Guardian and was intrigued to say the least. CRLS Guardian has a huge spread with a -2.2 bw to a 156 yw while still being in the top 1% for marbling, API, and TI he is a trait leader across the board in every measurable number. John liked him, the plus was Guardian is the top number bull in the entire nation, watch his video, he's not a glorified numbered Angus, he has MUSCLE, power, and look. The Simmental breed was meant to add power to your cow base, you don't have to compromise if you want to use a bull with an impeccable genetic profile.

Scheifelbein in Minnesota sold 20 Guardian sons that averaged \$7,000 and TSN Simmentals in South Dakota sold a Guardian son to Werning Cattle for \$37,000.

Guardian is a mature bull, there is no fluff to him. He is huge footed, solid good toes that point where they should, bone, substance, and powerfully made. The way the numbers read he ought to make you a heck of a set of replacements and the steers will feed like a dream. He has proven he can make bulls that demand a premium on a consistent basis.

We have long said the cattle need to match the numbers this bull does just that. We take a lot of pride in the fact that we bring high dollar bulls to your program so you can use them, everyone, not just an elite few. This is a bull that can change your numbers in one mating.

Guardian as a yearling

W W W . G R I S W O L D C A T T L E . C O M

We had several calls that this hands down was one of the best Simmental bulls to sell this spring. To see him is to believe all those calls. Powerful made, big footed, big topped and the cowman's kind, this is the kind of bull to make a cow base.

All Right, a bull that is an outlier in every facet of this industry. We hear talk every single day of genomic predictions, our one requirement at Griswold cattle is that the real world data and cattle visual appraisal match the cattle. Last year we bought what we felt was the top female out of the Windy Creek program, a full sister to this great sires dam, we bought her because she was the right kind, good udder, good feet, good looking, you know the kind, the one you want in the donor pen. She hails from the great Kappes Sadie T365 that has proven time and again that she consistently makes the sale topping kind,

consistency is key to profitability. All Right is a curve bender, a cow maker, he has the proven genetics, he has a balanced genetic profile and he's the kind to take your program to the next level. **Homo Black / Homo Polled**

What sets apart the mediocre from the great? DETAILS! It is about the details and Bank On It sets those details into motion. For those of you who aren't ready to jump on the red train yet but don't mind a few great red ones this is a bull you can't help but get excited about. Bank On it is out of one of the top cows in the country that offers an out-cross to the typical genetics found in mainstream pedigree's.

These are the right kind of cattle, they are big bodied, they grow, and they come out with a look all their own. When you sort them down the alley you quickly realize they are the kind you want, you will keep them as bulls and the heifers are the herd building kind.

W/C BANK ON 811

BRING ON THE

Red

Dayroll

Not just an ordinary cow on the bottom side, she's from the storied Frankenrider program and one of his top females he owns. The power of Broker is being proven time and again and you see it in this powerful sire. You love his muscle pattern, his structure, his feet and legs. Bobby May called John and said, "You need to be in on this one, he's one of the best I've seen all year." McCune loved him from the ground up, and he's not a Simmy guy, this bull is the right kind. He has true blue cattlemen behind him who have been around long enough to know what it takes to make a great one.

Everyone want's the hottest new red head, well here you go, jump on this ship as it set's out to sail, it's going to be a heck of ride with the quality of this kind!

New CALIFORNIA 131J

John and Bobby May both grew up raising cattle in Wisconsin. The May family lived on County O road and the Griswolds were on New California road. The history runs deep, years and miles later they are still good friends and they still rely on each others knowledge of what is going on in the cattle world. Bobby found County O and we are super blessed to be a part of him, it was only fitting that we named the best son we have raised out of the old bull to correspond with the history and nostalgia of his great sire.

We knew from the get go that Boots was special, we knew she had the power to be a changer and leading force but I don't think any of us realized just how much she would do. Her daughters are proving to have the same consistency and power as their dam. Her son's are rugged, masculine, and powerfully constructed, and in enters New California. New California lines up some of the most prolific pedigrees in the industry. You want cow power, he has it bred as deep as you can make one, masculine bulls you say? This is a bull that will make them. We stand behind the power, the legacy and the next generation of what New California can do. We have calves on the ground, they come out stout and they come out good!

"GETS BOLD RESULTS"

Bold Move has made quite the statement within the industry this past year. He was a crowd favorite in Denver and Reserve Champion Simmental Bull, admired in the yards and people lined up to see him at Cattlemen's Congress. When you talk about overall power, stoutness, look and design his name rises to the top. The calves are arriving at the G- and across the country and the reports have been awesome.

I was once told if you love a cow replicate her through her sons. Well hold on tight because Bold Move is the kind of bull that can do just that. He is a game changer combining two of the most influential purebred animals not only in our program but the entire Simmental breed. With the passing of both Boots and SAM this is a pedigree that brings their legacy together in one productive, functional, and powerful made individual.

His sisters and their daughters are in the donor pens, this is a multi generational cow family that makes the great ones!

His was the mother that was always just a little "to much" in the show ring, you know the kind, the one they call a donor because she's powerful made, big bodied, has muscle, shape, and you just fall in love with, the one that gets beat by the elegant, flat made ones.

It's ok, we aren't bitter because those are the kind that make herd bulls, they make donors, and they are the kind we LOVE!

Relentless x Mittens (Loaded Up x Boots (Broker)) yes you read that right it's generational, the Boots legacy, great cattle make great cattle.

This is a full brother to Maggie's show heifer that won Denver this year and was Reserve at OYE. This bull has enough play on just how he's bred on paper that you should like him, and when you see him in real life, you will soon realize that the daughters of Boots are going to continue the legacy of their great dam in making the top of the pen kind. He is big legged, powerful made, good structured, and flat out nice.

“DON'T WAIT FOR OPPORTUNITY, CREATE IT.”

In all reality it takes a few years to realize the power and the potency of a sire. On the Mark is going to be a go to bull for the solid reason that the cattle work, they are the real deal, and the money making kind. Daughters have been in high demand across the country, at Robbie VanHove's sale one brought \$21,000 to Harker Simmental. The cattle are consistent, good looking, powerful and the right kind on structure and size. We get comments every day on how much people love their On the Mark daughters. Consistency is huge in this industry, it doesn't matter if they can make one good, can they make 20 good or 30 good? We want a bull that is going to work no matter how you cross him. On the Mark is just that kind, he pulls in the potency and consistency of the top and bottom side of his pedigree.

Daughter of on the Mark

We could fill up pages of Steel Force daughters. Our whole program has been centered around Steel Force for good reason. Steel Force daughters have won every major show in the Nation. Herd sires and donor cows wear his name at the top of their pedigrees all across the country. We know how Steel Force daughters work, how they produce and his ability to transmit power and consistency down through the generations. We firmly believe Steel Force has had as much impact on the breed and industry as any bull in history. Steel Force's story is still being told through his daughters, granddaughters, sons and grandsons. The power of this great sire is evident. The true test of a bull is to sire a son as good or better than himself, Steel Force has done this several times over, Broker and Whizard are two of the top female producers in the Nation. He has sired as many great sons as any bull in the industry, EVER. He will go down in history as one of the greatest bulls of all time.

*STYLE, CORRECTNESS, AND BALANCE
 THROUGHOUT! WITH THE MASTERS
 STAMP OF APPROVAL!*

One sire that has been used as heavy as any G-bull across the Nation is County O. The cattle out of him are first class and he has proved he has what it takes to be a sire that can be used year after year. He has made sale toppers, show winners, and females in the donor pen. It isn't often that you find a bull that looks like a 1/2 blood in a purebred package.

We see a lot of cattle and travel thousands of miles to find them. Regardless of what breed you raise this is a bull that is the right kind. He's moderate framed, big hiped, stout through that lower 1/3, has all the rib you could want and still is able to do that with the front end that you simply do not find in the Simmental world.

Daughters of County O

After a bull has been used heavily his influence is seen full circle and the true test of time comes in his daughters ability to produce themselves. You will see people go back and use this bull again because of just how good the females sired by him are. Good uddered, big bodied, easy doing, solid cattle.

Loaded Up brings consistency and look to the table. We have mated him to all kinds of cows from the good ones to donors and he has the ability to click. He makes females and has made promotion bulls across the country every bit as good as the female counterparts.

Many of our top bred heifers and a solid set of bulls are sired by Shocker every year. At the end of the day they are solid cattle. Consistent time and time again, more important consistently good. You will be hard pressed to find a 3/4 blood bull that is as sound, big hipped and massive that still keeps such a loose structure. He has ample bone and comes down on a big solid foot with all four feet pointing the right way and hitting the ground right where they should. He is proud headed and good scrotaled. Shocker is the kind of bull you will use again after you try him once!

It does not matter if it is a set of replacement heifers or sale bulls, you will fall in love with the Shockers. If you are breeding for GOOD, SOLID, cattle and aren't just in the Simmental purist group that only breeds for a percentage, you better breed to this bull. He works on Simmy, crossbreds, and Angus females all day long. Consistent but even better, consistently good!

We live this life called ranching day in and day out. We love the cattle business and the people who are in it. We want the same soundness that makes cattle walk with ease and poise in the show ring as we do in the pasture so they can travel to water and hold up through the years and toil of raising calves and being a brood cow. Eye appeal and quality go hand in hand with performance and muscle. We like cattle that perform, not just for a fat steer on the end of a lead rope, but for the fat steer in the feedlot. We select for pretty udders, fleshing ability and soundness, because we like looking at the cattle in the pasture. Griswold Cattle is based in Stillwater and Poteau, OK. We know what it's like to have a sale in both the catalog printed, everything clipped and looking their best setting, to running a set through the sale barn, to having a buyer come look at our calves. We know firsthand the pressure of one day being a make it or break it for your family and your operation. We expect our cattle to work in our program and yours, we depend upon it, and we take it to the highest calling knowing you depend upon it. Real world cattle for the real world, functional, eye appealing, and profitable, we wouldn't expect any less..

ances are you have heard about Good Times, if you went to OKC you dang sure saw him. This is one the stoutest, coolest looking, functional, and sound Angus bulls you will hands down ever lay your eyes on, better yet, the calves are just that good.

We don't need another "Angus bull to make show heifers," we wanted a bull that would make show heifers, stout made bulls and functional females that turned into donors, we wanted the whole dang package and by golly Good Times flat out delivered.

The Stagemeyer family has proved they know good cattle and how to make them. Good Times is a bull that is big time good! His dam was Reserve Division at Louisville and 4th overall as a calf at Aksarben, many time breed champ and swept her fair share of jackpots. That's pretty sweet but the best part is she is proving that she is a wicked donor cow that will produce the great ones every time.

Fortunate

There is no denying that Good times made a splash in his rookie calf crop. He stamps his daughters with unrivaled look while injecting added body and rear leg design that we need more of in the Angus breed.

SON

With the overwhelming success of Good Times progeny, we are proud to introduce Fortunate Son. Simply put, this is the bull the Angus breed needs now more than ever. Fortunate Son is an outlier in terms of foot quality, bone density, mass, and sheer masculinity while maintaining the look we have come to expect from Good times. With all that he brings to the table visually, the cow family he stems from may just be the best part. If you study the bottom side of his pedigree, you will see he is out of the legendary Nords Lucy 8022 that will go down as one of the most elite females to be shown by the Stagemeyer family. Supreme Overall Breeds at the American Royal, and Reserve Supreme in the Junior and Open show on the hill in Denver, Reserve at the Junior National Angus Show, a huge accomplishments in perhaps the most difficult and competitive breed in the industry. She hails from the famous 1125 who is known for making cookie cutter females with that extra look, power, and quality. Nords Lucy is the ideal size, some show cattle are to big and to raw for the real world, she isn't, Nord's are from North Dakota where cattle have to be real world, they have to be able to withstand the elements and be practical, this is perhaps the most intriguing part of this great young sire.

After cementing her legacy in the ring 8022 has knocked it out of the park in production. She takes udder quality and maternal ability you have come to expect from the G- to the next level. You can use Fortunate Son with confidence knowing he will inject a heavy dose of quality and the intangible traits that made the Business Breed the powerhouse it is today.

Boyd Rosetta 0007 is a model Angus cow - From her incredible body shape and overall mass to her beautiful udder and immaculate feet, she has it all!

I don't want the flat one's, the ones that come with a set of numbers but leave out the importance of the cow. I don't just want the packer to be who gets a premium, if I am going to take the time to try and improve my cow base I want to do just that. I want good udders, longevity, eye appeal, I want power, a big foot, big top, and some rib, shape, and dimension, I want it all because those things are what makes up my bottom dollar, if the numbers are good, well that's a bonus! I want the cowman's kind, and Bell Ringer is just that.

Bellringer is a breed changer, a difference maker that offers reliable and predictable maternal genetics from a cow family that does everything right year in and year out! He combines "The Right Kind" of phenotype with phenomenal performance and bred-in carcass merit with perfect feet and a superb disposition. Big-time figures in his EPD profile which combines excellent genomics with unsurpassed individual performance.

Numbered cattle need to have the phenotypical profiles that match what those numbers say they are, they need to be well rounded and focus not just on how these cattle are going to feed and hang a carcass, or the fact that they calve easy, they need to have the maternal traits bred deep into their pedigree's. There needs to be a strong focus on the female, on the things that numbers can't measure. The number one thing we need to remember as producers, specifically seedstock producers is that visual analysis sells the majority of cattle in the pasture and through the sale barn, the fact that udder quality, feet, disposition, and longevity are just important as what carcass looks like hanging on the rail.

Schiefelbein Unreal encompasses the numbers and ranks in the top 4% of the breed with double digit calving ease and a negative BW EPD of -3.3 ranking him in the top 1% but also turns around in curve bender fashing and ranks in the top 2% for weaning and 1% for yearling. All of that is awesome but the part that attracted us the most to Unreal was the fact that he, his dam, and his sire looked the part, and were visually analyzed for all the things that make producers profitable. Coming from a line of donor females for the Schiefelbein program his dam in EPD ranking in the top 35% of 11 of the 12 major traits. This includes the top 1% for YW, 2% for WW, 3% for DOC, 4% for \$M, 5% for BW, 10% for Milk & RE, 15% for \$C and 25% for CED & HP. Before she was analyzed for her genetic profile she was analyzed visually, she was set apart from her contemporaries for having the eye appeal and balance that set good cattle apart.

Unreal reads awesome on paper, John called the first time he saw him and said "Jeannie, you are going to love this bull, he's your kind." At Griswold Cattle we know just like you what pays the bills, cattle have to work at home first! This is a bull that is our kind, numbers and all.

The power of maternal is hands down the most valuable piece in the cattle industry there is. We all love pretty show heifers but those cows, those solid Angus cows, well ladies and gentlemen that's where the long term profit is.

If you were at the Classic you saw him in living color, big footed, big scrotaled, big ribbed, big topped and just plain flat out powerfully made and the kind that says female maker all over.

Sired by Casino and out of the beautiful Coleman Dixie Erica 3372, Riverstone VEGAS 49H is the real deal. We are using him on our Style daughters and those that need a dose of big ribbed, big bodied, easy doing style while keeping performance and power in check.

follows the cow families

Akers Juanada 9100

Owned w/ Mullett Cattle

We are cow family gurus around here, it's the secret to consistency. John saw this bull and loved him but his pedigree, specifically the cow families GENERATIONS DEEP sealed the deal, then the fact that he is calving ease deluxe put the extra stamp of approval on him. On the bottom side of this pedigree you have EXT out of 710K who is an Anchor. Then you have Anchor x 709Z who was a Hero 6267 out of Anchor's dam 709V, so it is a brother (Anchor, 6807 x 709V) x sister (R R Hero 6267 x 709V) mating, you may have to read that a few times. 710K does best what Ohlde is known for, lining up those powerful females and stacking the pedigrees. In these pedigree's follow the cow lineage, that is where the true power comes into play.

Add all that to the epic cow family that has made Coleman's as famous as any Angus breeder in the Country. In this line you find Rainmaker 654X twice. The Donna cow family is epic in making those foundation cattle that have taken so many to the top of their game, she is unparalleled in consistency and potency.

Now we love pedigree's because we love figuring out why cattle are so good, but let's talk about the bull himself. We are going to start at the front and move on back. Study the makeup of this bulls head, you can tell a lot about him just by that. He has a presence about him that screams female maker. His neck comes out high on his shoulder and he's good fronted, good bodied, with rib, shape, and dimension, he has the muscle pattern and design to make females and has a 38 scrotal. You can't ask for anymore on a female making, easy calving bull.

Charlo is a Paxton, who is a Focus, who is a 654X x 1019 (Emblazon's dam) on the top side. Then you look to the bottom side and you have Great Plains who is an EXT x 1019, two doses of 1019, back on an Anchor, crossed up on one more dose of 709V back on the original Blackbird of RR 1204 (dam of Eureka), one of the original Rolling Rock cows who when

He won't be the bull that makes you a super high dollar show heifer but the females he leaves you will be unbelievable cows, the kind of females that as five year olds that you can mate to anything and they not only work but they look amazing doing it, mate the Simmy, Maine, or Angus, they will be the kind that "click". Set up the base, take care of the basics, everything else will fall into place. This bull is bred for potency and consistency.

Tim started breeding Angus she was one of the foundations. Tim is a mastermind breeder in making as consistent cattle as there is in the entire industry.

heifer safe, cow maker

CONLEY

Cash Back

2302

There are cattle that when you walk in the pen your eye is drawn to them, it doesn't matter how many head you look at you keep going back to the same one. That natural eye catching correctness and balance is what separates the great cattle from the mediocre, in the sale barn, in the pasture, in the ring, someone who has little to no experience judging cattle on the hoof can find the balance. Cash Back is that kind of bull.

When you study the pedigree you find profitable and productive cow families the whole way back. This bull has the look, the pedigree, and the numbers to make money across the board. Regardless if you are raising seedstock or loading your calves on the truck in the fall, use a bull that sets you apart from the pack!

Seldom Rest Sandman

We believe heavily in the power of Sandman and used him accordingly on our Angus cows, it's pretty easy to see just what he accomplished. Justify is the kind of cattle that we are proud to raise and proud to have wear the G- brand.

Justify has had a standout look from the time he hit the ground. His dam is a big volumed, and big time producer for us, we just flushed her after she's proven time and again that she has what it takes to produce great cattle. She produced lot 102 in the Grass Grid, for \$20,000 on her first go round, a \$42,000 Money Earned heifer that sold to the Stagmier family. She just may be the soundest female that we own on the ranch, hits her track dead on, big bodied and awesome fronted, and most important she's productive.

Go back another generation, you'll find Raptor, Fullback, EXT, Battle Cry, and Stockman 365, and 6807 and the bulls that built the breed. This is the kind of cattle to build a base with. Our secret to our success is the power of our Angus base, never underestimate the right kind of Angus cow and what she can do for your program.

Justify had a 16.5 REA, with 6.77 IMF, a scrotal of 39 and all the power you could possibly want in an Angus bull.

Andy is a maternal brother to the great Justify bull, his dam is one that does not miss. Better yet he is a true blue calving ease sire. With an actual 68 lbs bw -1 bw epd and a CED of +10. He is bred calving ease but still had a 14.6 REA and IMF of 5.91, he is the kind to produce a set of daughters you retain back into your program, he will add the maternal look and design you are after.

660B raised a \$44,000 show heifer in the 2020 Classic that sold to the Stagemeyer family in Nebraska. She produced Justify as her third natural calf as our \$50,000 high selling bull. She just entered our donor program as a does not miss female Take the homework out of trying to find the consistent cow families, don't breed to a bull just because he's a heifer bull, put some pedigree and consistency in your cow base, Andy is your man! Use with confidence.

Probably one of the more unique individuals in the sale is this Gold Standard son out of an Insight/Proven Queen female. The Proven Queen cow family is legendary—it would take a while to name all the champions that family has produced over the years! Gold Standard certainly does not need an introduction around here. Used extensively as a first-calf heifer bull, he has put progeny on the ground that go on to make herd bulls and donors for any type of program. The Omaha 029 bull is one of the best Gold Standard sons to date. With an extra shot of muscle and hair, this bull sets himself apart. Take a look and we think you will agree that this bull is the real deal!

For the ones that want just a little more grow than the Gold Standards and don't want to sacrifice calving ease, use Legacy. He will give you a little more size, and they are beautiful cows from a great cow family. He has been used in several 500 to 1000 cow operations that breed all their first calf heifers to him and they just don't have any problems. We had one of our top producers who runs 1000 cows and just uses Legacy on his heifers that said his Legacy calves are only 30 pounds behind his mature cows calves at weaning. That is pretty good for your first calf heifers. He said, "you better get those calves tagged within the first hour or you won't be able to catch them," they are as vigorous as any bull we have when they are born and they come easy. As a mature bull Legacy is something to be admired. He will tip the scale with overall muscle, rib, shape, and mass. He is producing daughters that are perfect uddered and beautiful patterned. He comes with the Griswold Cattle stamp of approval for calving ease. His dam hails from the 066 cow family that started it all for our family.

This is a bull that is as correct as any we have ever raised. He was the high seller in our Grass to Grid Bull Sale. Money Earned has had the look and design since he was a calf. He is big footed, with solid testicular development, muscle, power, mass, body, and shape. His dam is perhaps one of the most unique things about him. She hails from one of the most prolific cow families in the industry, the great Dixie Erica 001. Generations deep in functional, easy fleshing, prolific females. He was a crowd favorite in Denver and was slapped Grand Champion Angus Bull at the legendary Fort Worth Stock Show. He won't only give you the look you are wanting but also the performance. He is as massive of a mature bull as you will find and not in size just power throughout. The calves are proving they have all the look, design, and dimension of their sire. Use with CONFIDENCE

If there is a bull we are high on the older he gets it would be Moto Moto. Perhaps the most exciting part about this bull is he is a prime example of just what Money Earned is going to do! Moto Moto is a female maker! If you get a chance to see him in real life you will see just what we mean, He has all the rib, shape, and is the kind that all cattle should be patterned after. Moto Moto has the eye catching correctness you are drawn to and the kind of power to hold your gaze. His mother is incredible, his grandam is incredible, MATERNAL, breed this one to crossbreds or Angus, he'll make donors.

Moto Moto scanned a 15.54 REA and a 9.28 IMF. If you are retaining your calves and feeding them out, this is the kind of bull that won't sacrifice your cow base and will still produce cattle that will perform and hang on the rail. The industry needs more cattle that are multi-functional, here's your bull!

So nice you say it Twice!

Many things can be said about New Edition but perhaps the most important is that he produces the kind of cattle that you will keep in your cow base. If you were to ask me one bull to use on 200 head of cows to consistently change them to uniform, easy doing, good looking, and productive females your chances are pretty dang good that New Edition would be the bull of choice.

You cannot beat his daughters, beautiful udders, productive, eye catching, and easy doing. He's made as many great herd sires and donors as about any bull in the breed. Breed to mature cows only.

Do yourself a favor and put in a cane of Just Right this year. If you breed your heifers to him, it will be one of the best decisions you will make both for your view and your pocket-book. When you would walk up the bull alley at Stillwater you could see Just Right standing in his run, you could tell it was him from a mile away. He was a dead on carbon copy to his picture. You can't truly appreciate this bull until you have seen his daughters in production. PERFECT udders and teat quality, with a look that is consistently stamped out pretty. He stands as one of the most influential sires in our lineup. Just Right pops up a lot on the bottom side of our pedigree's, they are some of our favorite and most powerful cows.

Reserve Champion Bull at
Cattlemen's Congress

Bring on the power and bring on the good this is a bull that if you haven't used you need to. The calves are as consistently good as any high Maine bull in the industry. Game On brings power back to the game in making females that are full of dimension and style while still having the red muscle and design that made Maines famous to begin with, the bulls look like bulls should, stout, big bodied and real.

When I was buying heifers in Canada 30 years ago they would run them down the alley at you several at a time. It didn't take long to figure out you could tell a lot by just looking at their head, especially when you were trying to sort 80 out of 800. Game On has the type of head that I like, it was one of the first things that I noticed about him, it's the kind you find on good cattle and he has all the right parts from his head on back.

Purple is in his pedigree. His dam has produced National Champions that have won everything from Denver to Fort Worth. That power carries on down. 15 head of heifers averaged \$15,683 in Jiri Buck's sale.

Daughter of Data Bank

bringing home the style

If you follow the Sullivan Pulse and you stay caught up on the happenings of shows there is one bull you would be hard pressed to miss, his name shows up often and his daughters not only like the color purple they wear it well! Data Bank, the bull you better be willing to reckon with in and out of the show ring in the Maine Anjou breed.

No I-80, no Ali and he works awesome on those pedigree's! Data Bank hails

from some of the greatest cow families in the breed who have shown their power in the show ring but most importantly in the pasture. In an era when the search for a purebred Maine option has been somewhat limited, Data Bank is the answer. He is awesome footed, smooth jointed and is athletic as you can make a mature bull. His daughters are in production, good udders, and attractive females. Our lot 101 in the 2020 Classic was a Data Bank, that's a pretty big deal around here. Sale toppers, show stoppers, and plenty of online shoppers, do your homework, he's a bull that if you are in the business of turning a profit you need to be using.

duplicate consistency

Now this is a bull we couldn't be more pumped over, one he's flat out good and two his mother may be the best cow we one and you all know how we love a good cow family and this one is everyone's favorite.

you could put into ever calf. He hits his stride right on and does it in a powerful made package. This is a bull that literally has the potential to sire those females that still have the look and soundness you want while adding some power that you need. He is soft middled and easy doing. Generational power top and bottom with a pedigree you couldn't write out any better. There is a reason this one is good!

Belmont is a Data Bank x B571 (Hard Whiskey) oh and she goes back to 673R a direct daughter of OCC 816B a full sister to OCC Emblazon the arguably the greatest cow family to ever walk. I could write volumes. Take the time to go to our website and watch her video, it speaks for itself. B571 has as much volume, overall power, mass, and dimension as you could possibly put in a female, she simply has not ever missed, not once, every calf she has made has been the right kind, she clicks no matter how she is crossed. If I could replicate her a thousands times over I would, that's just how much we all love this cow.

A Garth daughter brought \$26,000 to Cleve Clark and won just about every major in Texas, her \$10,000 flushmate went to Florida to Shenefield family and has been supreme heifer at over 18 jackpots and won every place she has went. A full sib to Belmont brought \$17,000 and a Garth brother sold for \$9,000. His full sister brought \$35,000 as lot 101 to Lambright and Thwait's. This is a full list of progeny sold, B571 was one of those cows that wrote her own story and proved time and again that she was the kind that deserved donor status.

Belmont has stood out from the time that he was little, he had the bone, mass and power you wish

Klassified:

Jirl Buck said, "this is one of the best Maine bulls I have ever been a part of." He hails from a long line of donors. His dam has three full sisters in the donor pen, two of them at Brett Carters and another at Travis Otterstad's. We think this is the functional, big footed, big topped, solid Maine bull the industry needs.

We talk cow power, we believe in it, it's what makes cattle productive, profitable, and consistent. BKMT Dance Lessons 6012D the dam of Klassified was Res Grand High Maine, 2018 Junior Nationals and 3rd Overall high Maine 2017 JR Nationals.

In her short life she has gathered up triple digits in progeny sales, with maternal sisters to Klassified selling to Brad Smith, Brian McKay, and the Hunker families programs.

One of the biggest takeaways when you talk to Jirl and Brett in this bull is just how functional he is. Soft middled, big scrotaled, masculine, powerful, and REAL.

If we had to write a book on the most influential cows in our program it would easily be 066, her daughter 5066 is right on her heels. Maternal sisters to Masterpeice have produced our lead off heifers in the Classic, they have produced our top bulls, and our best replacements. They are donors and high sellers and no matter how we cross the matriarch 5066 she produces the top of the pen. Her daughter and maternal sister to Masterpeice, Miss Boston, was one of the most decorated females in the

Maine breed and was Champion at Junior Nationals as a bred heifer and as a pair. Her daughters led off the Classic this year and for good reason, they are good cattle.

One of the wisest pieces of advice I have ever received is, "if you love a cow breed to her son to replicate her." With two doses of the great Irish Whiskey and the maternal power of 5066 this is a bull you can not miss.

The Masterpeice calves are on the ground, ours look dang good here and the reports we are getting are strong across the board. Double doses of Whiskey, and cow families top and bottom that are consistent as the day is long.

Grand Champion Maintainer at Cattlemen's Congress and American Royal.

 POWERS SKYLAND EMULOUS

Makin Time didn't get used super heavy the first year we bred him, but where he was used he clicked as well as any bull we have ever bred. He increases the potency of Maternal Made and the 0-04 cow by adding the bottom side of 1829. This is a bull that if you are into making females with consistency and potency you need to be using. When used on Whiskey the resulting females are breathtaking. Makin Time will be the replacement for Whizard.

Makin Time's dam, 1829 is one of the greatest cows we have EVER owned, she makes herd bulls, she makes donors, the most important thing she does is makes them good! She is the dam to Cerveza and Whizard, two bulls who have sired as many high dollar females for raising club calf bulls as any bulls in the industry besides Whiskey. Maternal sisters are in our donor program and are proving the same consistency as their dam. His full sister just may be one of the best cows we own right now.

Miss Boston

This is the kind of bull that we dream of making, the kind that puts everything together from pedigree, to phenotype, to performance. Bulls like this don't just happen, they are rare and that said they are special. "Boston" has made herself a household name.

Boston isn't just a fluke, she's not just a cow that happened to be good. A direct daughter of 5066, the dam of Masterpiece, Bae, Jezeabelle and countless high sellers and great cattle. 5066 a daughter of 3066 who was a full sister to 2066, the dam of Chill Factor. 3066 Owned w/ Brad and Kevin Holt

was as pretty a cow as you have ever seen, she was beautiful. She had a TJ heifer that Frank and Christina Ward bought for \$11,500 in the Exposure when \$11,500 was like a \$100,000. Those cows came from 066, the cow that came from Wisconsin and started it all, DONORS, DONORS, AND DONORS.

You bet this pedigree gets us pumped up because they are the right kind of cattle, consistency is bred deep. Use this bull on those flat made Angus cows to add an extra dose of shape, power, and dimension.

Safety Plan 2407K

Safety Plan on his own merit is the kind of bull you fall in love with when you walk in the pen, bold ribbed, big footed, on a solid foot and the one you go back to time and again, then you look in his ear and realize there is a reason he's put together like he is. His dam is the great 5066, who stands as one of the most influential donors we have ever owned and he himself is a full sib to Boston. His story begins generations before in Wisconsin, a family set out to raise good cattle, they came with Joe, his family a truckload of dreams to Oklahoma where John would end up with 066, with little knowledge of how that one line of cattle generational all the way back to his fathers, fathers would influence his life and change our program.

5066 has made her fair share of herd bulls as well as plenty of daughters that reside in the donor pen and as top producers not only in our program but in other programs across the country. Study this book, look at his REA, his IMF, look at his scrotal. This bull is the real deal from the time he hit the ground. We can't emphasize enough the importance of cow families and especially the 066 cow line, it's what our entire program has been based around. If you are into making good cattle follow a Safety Plan!

Good cattle don't just happen, they are not just coincidental, the majority come from years of work, a solid breeding program, based upon solid goals to make the good ones better. Breed to generational solid cattle.

Garth is the most consistent Maine bull we have used since Whiskey. It is pretty hard to believe that he is clean because he sires them like he's dirty. He makes them big boned, STOUT, hairy, and good looking. He has produced some of the breeds leading sires, top donors, and show winners. He's real, he's consistent. We always get a lot of calls on people wanting us to buy bulls, we had more calls on awesome Garth son's than any bull we owned last year. We could fill up this page with pictures of Garth progeny, point made, they are good cattle. Only use on mature cows.

Full Tilt represents the next generation of calving ease Genetics in our program. Daddy's Money paved the way throughout the country for High Maine genetics to be utilized in programs for ultimate calving ease without sacrificing power, and look. Full Tilt is the next one in line.

Full Tilt is a tremendously designed 3/4 blood High Maine option that blends enough Chianina genetics from the MS Ace 308Y female and dam of Dual Threat, to make every one of his offspring eligible to be Dual Registered.

Study Full Tilt's design and you'll quickly discover that he's just not a calving ease bull, but an option to add additional power, muscle, performance and

tremendous look and style. Selected as Grand Champion Maine-Anjou bull at the 2020 Fort Worth Stock Show and Rodeo and Reserve Grand Champion Maine-Anjou Bull on the green shavings at the 2019 North American, Full Tilt combines show ring appeal with true calving ease as he only weighed 59 lbs. at birth with his full sister weighing only 61 lbs.

Heifer safe on big stout broody heifers, we don't use him on small heifers that aren't mature enough.

You will be hard pressed to find a full face baldy that is a high percentage like Turn it Up! He has the markings and the style to turn heads and hold a gaze!

A man in a light blue button-down shirt and a white wide-brimmed hat is working with a bull. He is holding a long metal rod or tool, possibly a lead rope, and appears to be adjusting something on the bull's head. The scene is set outdoors, with a yellow metal structure, likely part of a truck or trailer, visible in the foreground and background. The lighting is bright, suggesting a sunny day.

G-

GRISWOLD CATTLE

THE TRUSTED BRAND

The bulls in this book have grown beyond what we ever dreamed when we started this venture. The semen part of Griswold Cattle is bigger than what we ever imagined, it's all happened one step at a time. One bull, one trip, one auction, one handshake, it didn't all come at once. As you flip through these pages the biggest difference we want you to realize as you turn these pages is that we are a family, the ranching life is what we do. The cattle that offer a premium, those are the kind of cattle we strive to raise everyday and the kind we seek out and find. You will see that every bull on every page has eye catching correctness and eye appeal, they have balance, good mothers, and pedigree that stand behind them generations deep, they didn't just happen, they were the result of conscious effort to improve a program and the industry as a whole.

Our brand is our mark, it tells our story, and just like our name it is a representation of who we are. The G- brand has become a household name to cattle producers from coast to coast, you know that when you see that brand it means quality, it means trust, it means commitment. You have our word that we will work every single day to keep it that way. We wear it with pride, it stands as our commitment and our promise to you. We believe in good cattle, that cattle can be good looking, functional, and profitable, that handshake is your word, and your customers should be your friends first.

 JSUL MA X AN 6651

6640 has produced more national champions and supreme champions at every level than any female in the country. Time and again Who Da Man daughters have proved they have that extra look, extra extension and extra style and able to transmit it to their progeny bringing what we all want, that extra money. Who Dat Class brings one more dose of extreme power and consistency to the legend of Who Da Man.

Sullivan Farms wrote that Who Dat Class was the best Who Da Man son ever produced. This future super star sire is from the ever popular and proven Who Da Man/6640 mating that has produced multiple champions from state fairs, national champions, to the 2012 and 2017 NAILE Supreme champion females. He just might be the next replacement we have been searching for to replace his great sire. 13.08% Chianina THC PHF DSC.

We went on a mission to find the best Red Angus bulls in the industry and put a bug in everyone's ear that we could think of that we were in the market. John got a phone call from Luke Dorris on sale day about 45 min before it started that Red Eagle was the real deal, big bodied, sound made, powerful, and the cow making kind! Josh Taylor said this is one of the most impressive Red Angus he has ever seen and that is saying something, we have to agree!

Red Eagle is unmatched in his body composition, and muscle. He has as much shape, width, and center mass as you will find regardless of color or breed, couple that with an attractive profile and great pedigree. He is sound made, and bigger legged than most Red Angus and has the feet that the industry needs and demands!

The calf reports are on target with cattle that correctly made, functional and productive. High sellers have dotted the nation and you are going to see more of this bull in the future!

Eric Richards has been a family friend since he was a little boy. He helps us whenever we are in a pinch from clipping to feeding, he is super handy, plus he knows good cattle. He called us and told about a Red Angus bull that was soggy made, powerful, easy doing, and easy on the eyes. In walks Harvest Moon.

This is a bull that is the cattlemen's kind. He has the look, doability and performance to flat out work on papered set of cows and on a commercial outfit. He is loose structured and his feet and legs are awesome.

ORDER SEMEN NOW! 405-372-3300

Calving EASE w/ class!

He's deep cherry red, with body, shape, and calving ease deluxe! His dam is a tremendously sound made, perfect uddered, easy keeping, first calf heifer that milked like a dream for her first trip around the sun. Peacemaker himself is flawless in his feet and leg structure, balanced in his angles, smooth shouldered, tight chested and upfronted. He is positioned to make incredible females. Peacemaker's sire is a Rioja son that is a full brother to the popular 2019 Reserve National Champion female also raised and exhibited by the Rathmann family that was touted for being near perfect in her basic build. This is a versatile bull that will be the "Peacemaker" with cows that need to be upgraded in their function.

Detour won shows all over Canada as a calf. His dam was the 2008 RBC Supreme Champion Female and 2008 Canadian Angus Show Female of the Year. More important than his show career is his ability to produce. His calves are consistent in type, born effortlessly and have the "look." John went to visit Wildcat Creek and every Detour calf he saw he liked, he wanted him for our sire lineup at Griswold Cattle.

He will work on heifers and he makes the functional kind of cattle that bring a premium time and again!

BRING ON THE POWER!
 Long bodied, with plenty of rib, shape, depth and structure! You will be hard pressed to find a bull that has this much power and substance and still moves and handles himself this well.
 With the balance correctness and eye appeal he's the kind that stops and hits a pose and turns your head time and again.
 From the Hoffman program that is known for consistent quality comes one of the exciting new Hereford sires of the year! Jason said, "This bull will be better than his sire. More expanded and softer in his rib, bigger and deeper bodied throughout, he is a herd bull."

"It ain't dying I'm talking about, it's living,' Augustus said. 'I doubt it matters where you die, but it matters where you live.'"

Gus is as easy to love as the morning loves daylight, it just happens.

With all the things that one bull needs to make a success if you are serious about Herefords you need him in your lineup. Square hiped, stout made with solid cattle, from solid programs standing behind him. When John saw him this spring he was one he knew he wanted in our lineup.

He's been flushed to the great ones and it's easy to see why, it wouldn't matter if he were black or purple, he has all the parts that good cattle are made of!

It ain't dying I'm talking about, it's living. This is the kind of bull that gets you pumped about the Hereford breed!

HE'S A POWER BULL
WHEN YOU SEE HIM, YOU'LL LOVE HIM

High Roller was the popular 2019 Reserve National Champion. He is without a doubt one of the most complete, balanced and fault-free bulls out there. High Roller is huge footed, big boned, square hipped and loaded with power. His unmatched look of balance and eye-appeal sets him into a league of his own. He was one of the most talked about bulls at the National Western Stock Show in 2020 and received praise from some of the most well respected cattlemen across the country. We have the utmost confidence that High Roller will sire elite Hereford cattle that command a premium.

Non certificate bull.

We talk about Bobby May quite a bit, one he's a big eyes and ears for us everywhere he goes and all that he sees. He called John on Bandit and said he needed to go see him. Long story short on one of the many trips to South Dakota taking bulls back and forth to 605 Sires, John stopped in Thedford, Nebraska to one of the great cowmen of the industry, Jason Hoffmans and saw Bandit in the flesh, struck a deal and here he is.

His maternal sister produced, Conley Nancy D6 one of the winningest females in the country who went on to be National Reserve Grand Champion Female of the year in 2017. Another maternal sister was Champion percentage heifer at Charolais Junior Nationals this past summer. Bandit's maternal grand dam is a flush-mate to the show female of the year in 2006, this pedigree is full of correct made cattle that have been bred for generations for eye appeal and sustainability.

Pretty easy to see why good cowmen would like him, he's the cowman's kind!

it's a generation thing!

Redemption represents generations of genetic predictability in the Charolais breed. You will be hard pressed to find an individual that combines the power, performance and structural integrity, along with the most unique and perfect design and impeccable look in a purebred Charolais, like it is in Redemption. His dam was the 2014 American Royal Junior Show Grand Champion Female and full sister to the current National Champion Female, WC Kendall 5173. Redemption is that rare find of power, look and predictable pedigree that can truly change your cowherd in ONE GENERATION. If you're serious about the Charolais business or that discerning cat-tleman that appreciate the good ones, CCC WC REDEMPTION IS THE ANSWER.

Redemption himself in a short show career was selected as the 2017 American Royal Breeders Bull Classic Champion Bull, was the anchor Bull in the Champion Pen Of 5 Charolais Bulls at the 2018 National Western Stock Show and the National Spring Bull Calf Champion for Wright Charolais and Cody Cattle Company.

*"Redemption x Outsider PB Char bull at Shireman's in Indiana., This boy is bad*** good ! For Sale. His front is beyond stellar, sappy middled, huge footed, good boned and sound as a Bose speaker. We used Redemption again this year and the calves continue to impress us."*

Sisters of Legal

If you follow the Limmy breed Larissa is a household name, she shows up on the pulse perhaps more than any other cow. She was a Junior National Champion and swept the Nation in purple and her daughters have followed suit, the biggest question at the show is which one of her daughters the judge is going to like the most.

We all know well the power of a cow family, for those of you chasing good cattle, here is a bull that is going to help get you there! Top and bottom he is stacked with the pedigree's of Champions. If you are serious about raising good Limousin cattle, buy a cane, breed your cows, and then get ready to start marketing the great ones! If you use him on a PB Angus cow you will have progeny that can be registered as LimFlex.

BOSS LAKE *Red Eye* 207K

The purebred Limousin bull we have all been waiting for! 100% and Homo Polled, this elite herd sire is dark cherry red and phenotypically a stand out.

Outcross to many mainline pedigrees, Boss Lake Redeye is backed one of the most winningest purebred cow families including two top five finishes at Junior Nationals and most currently Champion Jr Limousin Female at OKC.

207K is geared to make them stout, dimensional and functional all while keeping that look and unique style that the industry demands. He boasted a 37cm scrotal and froze high quality semen at only 12 months of age.

An outlier since birth, this is one bull you aren't going to want to leave off your semen order!

Cell phone shots of Good to Go

Full Sister to Good to Go

Here I Am x Merlin (Whizard x Irish Whiskey)

Owned w/ Vanhove Cattle Co

Over the last few years, Here I am has become synonymous in the club calf business for dominating show rings across the country. In our search to find elite individuals to add to our sire battery in the club calf business, we searched the entire country for the best Here I Am son. We found him in Madison, South Dakota at Vanhove Cattle Company.

Good To Go, combines the unique blend of power and structure in a maternal-based program. His dam is one of the most impressive young GCC Merlin (GCC WHIZARD 125W x IRISH WHISKEY) daughters in the Vanhove program, which only strengthens the predictability of future champions out of this tremendous stout, huge footed, massive hipped, soft middled, chubby, freaky necked, shaggy haired and ultra sound sire of the future. Proven maternal foundation.

Look Twice, he's good to go!

GRISWOLD CATTLE

THE TRUSTED BRAND

Griswold Cattle is a seed stock operation but we see all aspects of the industry. We raise females, we produce bulls and we feed cattle in the feedlot, no one ever said a steer that hung a good carcass had to be ugly. We strive to produce the cattle that win in the show ring and the kind you like looking at just as much out in the pasture, those two things can and should go together. It's more than numbers, it's about common sense. "Maternal is more than milk, carcass means more than marbling, and performance means more than just pounds weaned"
