

LORE BED

ABOUT

How many nights are in three generations? Our LORE bed was made to be a family heirloom that gets passed down again and again (and maybe even passed around the country, since it breaks down and re-assembles so easily). Its headboard design allows for the natural expanding and contracting that occurs with solid wood—so the brass dowel-reinforced joinery coexists peacefully with changes in temperature and humidity. The soft, eased edges and heavily rounded outside corners make it a joy to live with everyday. And with each material working together and playing to its strengths, you can rest easy knowing it's strong enough to endure and be enjoyed—by you, and by your grandkids, too.
