

# WOOLGATHERER CARDING MILL

## PREMIUM ECO WOOL®

Our famous trade marked blend since 1999. This is an American grown and made product.

**We source the majority of our wool directly from family farms in Oregon and California.**

This special blend consists of the ideal amount of coarse and fine long fibers. Premium Eco Wool® has been proven by bed and furniture designers to maintain a nice loft longer over time than poly fillers and other non-natural products. Premium Eco Wool® batting is the right choice for the discerning bed and furniture designer as well hand crafters, as it is robust and consistent.

**Our Growers:** Premium Eco Wool is hand-selected from Domestic Wool Growers who adhere to our high standards for purity and managing their flocks in a humane, chemical-free, and environmentally thoughtful manner.

Having a personal relationship with each of our wool-growers is mutually beneficial. We are able to request that the farmers use our chemical and cruelty-free growing criteria. We can also give farmers our specific wool preferences (such as how fine or coarse, or the amount of crimp) so that they can alter their flocks to fit our specifications.

**The Process:** All of our wool batting is among the cleanest and highest quality in the world. We are a primary producer in the USA using domestic wool.

Our wool is combed into batting on one of the only 3-Breaker Carding Machines still operating in the U.S. Our Premium Eco Wool® Batting adds a level of quality and customizability to wool batting that is rarely available from other mills. Our carding machines stretch and comb the wool into a beautiful thick batting that is resistant to migrating through bedding fabrics. It is available to customers in a wide variety of dimensions and sizes to custom-fit their unique product application and designs.

(Available Dimensions: 55" to 88" wide – 1.0 lbs./LY to 3.3lbs/LY)

- ABSORBS MOISTURE
- REGULATES BODY TEMPERATURE
- CHEMICAL FREE/PESTICIDE FREE
- LOW VEGETABLE MATTER
- DOMESTIC WOOL
- CHEMICAL FREE/PESTICIDE FREE
- NATRUALY FIRE RESISTANT
- LOW IN VEGETABLE MATTER

### Guaranteed Purity With Integrity

Supporting our customers with a pro-active philosophy towards ensuring only pure and natural products are brought to the market. Woolgatherer Carding Mill takes the extra step by testing all of our products through the nations leading Toxicology Laboratory for animals, on an annual basis. This tests for any pesticide, herbicide and heavy metals such as arsenic. Test results are made available to all customers upon request. By avoiding intercontinental-transport, we are promoting a regional industry with a smaller ecological footprint.
