

BRUNA

Ring measuring tape

With this measuring tape you will find your right ring size.

Control line:

How it works:

1. Print out the document in DIN A4 and make sure that the print settings are scaled to 100%.
2. Measure the control line on the printout to ensure that it equals 10 cm.
3. Cut out the ring measuring tape along the dotted line and cut the small slit at the upper mark.
4. Now you can put the band around the desired finger and put the end through the slit.
5. Tighten the measuring tape until it fits comfortably on your finger and read off your ring size.

Tip: If you are between two sizes, we always recommend sizing up.
