

DESK PLANTS

taking care of your

JADE

Native to Africa, the Jade Plant has been used all over the world and has long since been featured in the ancient practice of feng shui. This plant is not pet-friendly.

THE ROUTINE:

● LIGHT

I prefer low-medium light, though sun during the day helps me grow.

● WATER

Every 2-3 weeks when my leaves thin out and my soil is dry.

● TEMPERATURE

I can adapt to both cool and warm environments.

● PLANT CARE

If I'm wrinkled and my soil is dry, I might need more water.
