

DESK PLANTS

taking care of your

MARBLE QUEEN POTHOS

The Pothos plant is notoriously resilient and will survive low light conditions and uneven watering schedules. This plant is not pet-friendly.

THE ROUTINE:

● LIGHT

I like any type of light, but bright light helps me grow.

● WATER

Every 2-3 weeks or when my leaves have drooped.

● TEMPERATURE

60°-85° F is ideal, but just keep me away from cold drafts.

● PLANT CARE

Yellow leaves can mean overwatering! Oh, please trim any brown leaves.
