

DESK PLANTS

taking care of your

SANSEVIERIA

Native to Africa, Madagascar and southern Asia, the resilient Sansevieria is effective at removing a variety of airborne pollutants including benzene and formaldehyde. This plant is not pet-friendly.

THE ROUTINE:

● LIGHT

Some light is ideal, though I can tolerate most conditions.

● WATER

Every 1-3 months, but my soil should be completely dry

● TEMPERATURE

I can adapt to both cool and warm environments.

● PLANT CARE

If repotting me, make sure to use well draining potting mix.
