

DESK PLANTS

taking care of your

ZZ PLANT

Originating from drought-prone areas of Africa, the ZZ Plant is the toughest plant we offer. You can have two "brown thumbs", and you would still find it hard to kill this plant. This plant is not pet-friendly.

THE ROUTINE:

● LIGHT

I'm happy anywhere, on any desk, in any light condition.

● WATER

Every 1-3 months, but I like my soil completely dry

● TEMPERATURE

I'm very adaptable, so any office space will work for me.

● PLANT CARE

If I have brown leaves or rotting stems, you are overwatering me.
