## Section 5: Fire Fighting Measures

*Flammability Summary:* **Combustible at elevated temperatures**

*Extinguishing Media:* Use alcohol resistant foam, carbon dioxide, or dry chemical extinguishing agents. Water spray or fog may also be effective for extinguishing if swept across the base of the fire. Water can also be used to absorb heat and keep exposed material from being damaged by fire.

*Extinguishing Media advised against:* No Data Available

*Fire and/or Explosion Hazards:* Vapors may be ignited by heat, sparks, flames or other sources of ignition at or above the low flash point giving rise to a Class B fire. Vapors are heavier than air and may travel to a source of ignition and flash back. Dusts at sufficient concentrations can form explosive mixtures with air.

*Fire Fighting Methods and Protection:* Do not enter fire area without proper protection including self-contained toxic breathing apparatus and full protective equipment. Fight fire from a safe distance and a protected location due to the potential of hazardous vapors and decomposition products. Flammable component(s) of this material may be lighter than water and burn while floating on the surface. Use water spray/fog for cooling. Flammable component(s) of this material may be lighter than water and burn while floating on the surface.

*Hazardous Combustion Products:* Carbon Oxides

Additional precautions may be necessary based on special circumstances created by the spill including; the material spilled, the quantity of the spill, the area in which the spill occurred. Also consider the expertise of employees in the area responding to the spill.

*Methods for Cleaning Up:* Prevent the spread of any spill to minimize harm to human health and the environment if safe to do so. Wear complete and proper personal protective equipment following the recommendation of Section VIII at a minimum. Dike with suitable absorbent material like granulated clay. Gather and store in a sealed container pending a waste disposal evaluation.

## Section 7: Handling and Storage

*Handling Technical Measures and Precautions:* Harmful or irritating material. Avoid contacting and avoid breathing the material. Use only in a well-ventilated area.  
 Use spark-proof tools and explosion-proof equipment Minimize dust generation and accumulation

*Storage Technical Measures and Precautions:* No special requirements Keep away from sources of ignition Store in a tightly closed container.

*Materials to Avoid/Chemical Incompatibility:* Strong oxidizing agents Acidic conditions Aluminum alloys Strong acids.

## Section 8: Exposure Controls/Personal Protection

*Engineering Measures:* No exposure limits exist for the constituents of this product. Use local exhaust ventilation or other engineering controls to minimize exposures and maintain operator comfort.

*Respiratory Protection:* Respiratory protection may be required to avoid overexposure when handling this product. General or local exhaust ventilation is the preferred means of protection.  
 Use a respirator if general room ventilation is not available or sufficient to eliminate symptoms.

*Eye Protection:* Wear chemically resistant safety glasses with side shields when handling this product. Wear additional eye protection such as chemical splash goggles and/or face shield when the possibility exists for eye contact with splashing or spraying liquid, or airborne material. Do not wear contact lenses. Have an eye wash station available.

*Skin Protection:* Wear protective gloves. Inspect gloves for chemical break-through and replace at regular intervals. Clean protective equipment regularly. Wash hands and other exposed areas with mild soap and water before eating, drinking, and when leaving work Have a safety shower available.
