

X-eyes
LITE

ABOUT US

Introducing X-eyes Lite, a range of titanium and acetate eyewear.

A bright and colourful 25-model collection, with an incredibly thin and 'lite' feel. Offering a variety of modern and classic styles, these minimalistic titanium frames feature high density acetate fronts, promoting a much thinner and more premium look than regular acetate.

The nose pads are comfortable silicone and the titanium material ensures maximum durability and lightness, as well as being hypoallergenic.

If you're on the lookout for a luxurious, lightweight titanium frame that won't break the bank, look no further than X-eyes Lite!
