All about the store:

Literary Book Gifts sells t-shirts and so many other items based on classic literature and books. Established in 2018, the online store has been creating and delivering presents to so many book readers.

About the designs you see in the book gifts store:

Each and every design is lovingly handcrafted. Certainly in the past once upon a time they would have been drawn by hand but that was back in the day. These exciting new designs are remastered for digital printing use. The collection has works selected from vintage literature such as authors like Jane Austen, Louisa May Alcott and Mark Twain. Dive right into the store and you are sure to find a gift based on a book you recognize. Simply browsing through the store will bring to your mind nostalgia of reads from your childhood and beyond.

Why have books on shirts?

You may be thinking what is the point of having books on shirts? After all books are words and these words are in paper, or these days digital inside of actual books—not apparel or gifts. Maybe you would just want to give a loved one a hard copy of *Treasure Island* by Robert Louis Stevenson. Perhaps that would be a better gift than an actual shirt. This is certainly correct, and I defiantly understand where this line of reasoning comes from. But the idea behind this store is that books are so much more delightful when shared. Read them! Share them! Never stop thinking about them! I've read so many novels and never had the opportunity to discuss them with others. It's such a shame as it adds such a greater dimension of value to the authors ideas held within the book. The aim of the shirts is to get the conversation started about these books and book gifts.
