

Declaration of conformity

Saint-Gobain Cultilene BV
Zeusstraat 2
5048 CA Tilburg
The Netherlands

Tilburg, January 19, 2018

Saint-Gobain Cultilene BV (here after Cultilene) is a subsidiary of renowned Saint-Gobain company.

Cultilene develops, manufactures, distributes and sells mineral wool products which are used as substrates in soilless cultures in greenhouse cropping systems.

The products of Cultilene are sold in Europe, Russia, Canada, USA, Mexico, South Korea, Japan, Australia and New Zealand.

Cultilene production sites are working according to ISO 14001 and ISO 9000 Standards

Products of Cultilene are certified under product certificate Guideline: Kiwa BRL K10001 (Guideline for substrates). The scope is this guideline is including propagation cubes and mineral wool slabs for use in vegetable production. The certificate number for Saint-Gobain Cultilene is: K 23901/2 and is issued by Kiwa N.V. Certification and Inspection.

Raw materials used in production of mineral wool are solely sourced from areas that are not a Natura 2020 area.

The French norm NF U 44-551 sets limits on the heavy metal content of substrates (growing media) and soil improvers.

The products of Cultilene are in Classe 1.12 (Laine Minerale)

The Cultilene products fulfill all French norms and standards concerning mineral wool growing media.

Semi finished and finished products are produced, packed and stored in our facilities under conditions to minimize hazardous contamination.

Semi finished and finished products are transported and delivered under conditions to minimize hazardous contamination.
