Confidently automate the perfect pH and nutrient levels in nutrient reservoirs

Easy integration for nutrient solution management.

Your time is extremely valuable, don't waste it manually dosing.
Designed to be teamed with the Bluelab® Pro Controller for a fully integrated solution for optimal reservoir dosing, the Bluelab® PeriPod™ is a simple and reliable inclusion.
The Bluelab® PeriPod™ responds to dosing triggers received from the Bluelab® Pro Controller and pumps pH adjusters and nutrient stock solutions into your reservoir using peristaltic pumps. Accurately measure, control and maintain pH levels.
Grow sites are all different so now you can choose the combination to match your set up needs and add multiple PeriPods.
Connect to M3 or M4 PeriPods will enable multi-dosing up to 12 nutrients or pH adjusters. External alarm box and sample pot available to customize your nutrient dosing system set up.
Visit the Bluelab® PeriPod™ pages on bluelab.com to read more about which pump size is suitable for your system
