

DXIO digital control interface features up to two (2) 10A NO/NC relay contacts, two (2) 1-Amp transistor (FET) outputs capable of 1kHz PWM, and two (2) analog inputs selectable for 0-5V or 0/4-20mA. Ideal for operating DC powered solenoid and irrigation valves, relays & contactors, etc. PWM functions for integration with dimmable lighting or variable speed motor controllers. Analog inputs allow SXL liquid sensor connectivity and other third-party 0-5V or 0/4-20mA sensors.

Connects instantly to Agrowtek's master control systems or intelligent sensors via a GrowNET port for advanced automated control functions. GrowNET port accepts MODBUS RTU communication for PLC control.

LED indicators on the front panel provide status of power supply and data communications. Designed for DIN rail mounting in control cabinets. *UL Listing pending.*

### Features

Two (2) 1-Amp Transistor Outputs with 10-90% 1kHz PWM

Two (2) 10-Amp NO/NC Form C Relays

Two (2) 0-5V or 0/4-20mA Analog Inputs

PWM Capable Transistor Outputs

Built-In Flyback & Transient Suppression on FET outputs

GrowNET™ Digital Communication Port

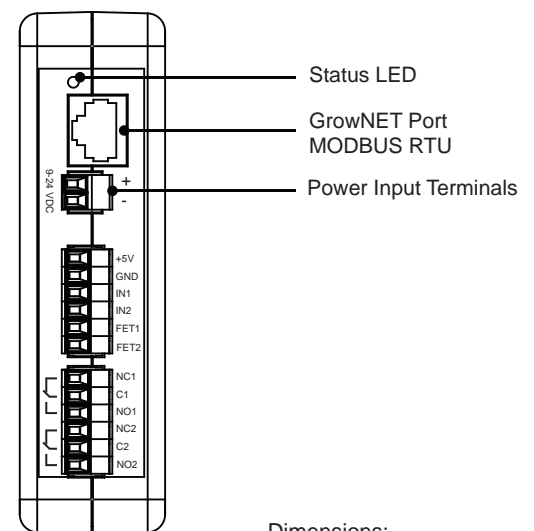

MODBUS RTU for industrial PLC applications 9-24Vdc, DIN rail mount

Made in USA

1-Year Warranty

Dimensions:  
4.5" H x 1.3" W x 4.1" D

## Applications

Irrigation Solenoid Valves

Custom Equipment & Sensors

Relay Control  
Load control in buildings & greenhouses

Variable Speed Fans & Motors

### GrowControl™ GCX Controller

Connect to GrowControl™ Cultivation Controllers for advanced functions as part of a complete facility control solution. GrowControl™ GCX systems feature intelligent control functions optimized for today's complex growing environments.

### USB

Connect GrowNET™ devices directly to a computer using the LX1 USB AgrowLINK™ and free PC software for data logging and monitoring.

### MODBUS

GrowNET™ devices are easy to implement on PLC systems with MODBUS RTU and a LX2 ModLINK™ interface. Multiple GrowNET™ devices can be connected to an interface with HX8 GrowNET™ hubs.
