

# FORTIFY CLOUD

## QUICKSTART GUIDE

**1**

**REMOVE ALL PLANTS FROM TREATMENT AREA BEFORE ACTIVATION.**  
**Seal the treatment area.**  
 Assure all doors, windows and entryways are sealed to contain gas.

**2**

Shake vigorously for 3-5 seconds to loosen granulated chemical. Open Fortify Cloud canister. **Completely remove lid prior to use.** Each canister contains powder and small measuring cup.

**3**

Remove small cup from canister and fill to specified level with **WATER**.

**4**

Pour water into canister.

**5**

Agitate lightly to thoroughly mix water and powdered chemical.

**6**

Place canister in treatment area.

**7**

Place canister on a solid surface.  
 Place lid or a small catch tray underneath the canister.

**8**

Chlorine dioxide gas is activated. Shortly, the canister will fill with a yellowish gas. Keep area sealed for specified time period. **DO NOT ENTER AREA** without proper PPE. **DO NOT VENTILATE.**

**9**

After specified time period, turn on exhaust from outside treatment area and/or exhaust remaining gas. Place lid on canister and throw into trash.

**10 YOUR TREATMENT IS NOW COMPLETE**
