

Automated pH Control | ORP Optional

MPX pH dosers automate pH and ORP control in large or small tanks for irrigation, re-circulating hydroponic systems, aquaponics, aquariums, pools, and other general industrial/commercial processes. Available as a pump and controller kit, or as a pre-assembled panel with manifolds. Available with single, dual or quad metering pump. Each pump can be configured for ORP or pH up/down dosing with independent dose sizes. PHX pH controller with LCD display allows advanced configuration of the pumps and dosing parameters, manual pump priming, as well as graphing, alarms, data logging and more in a simple to use menu interface. AgrowDose peristaltic pumps have legendary reliability, are self-priming, draw over 10ft of lift and pump into lines up to 25psi/ Pumps feature easy-maintenance with no-tool, twist-off servicable heads. Connect to Agrowtek's GCX control systems for advanced monitoring and remote control.

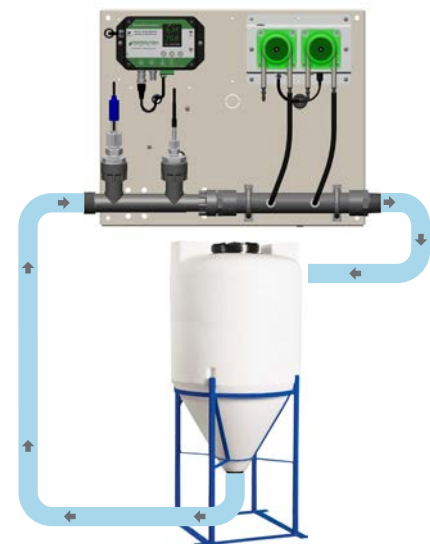

MPX2P

Panel Option

Conveniently mount controller, dosing pumps and water manifold on a stainless steel back panel simplifying install and providing a clean, professional appearance. Manifolds also available as individual components.

For Recirculating Systems

Dose pH buffers and ORP chemicals into a water system to maintain target pH levels. The controller monitors the pH (and ORP) sensor, and if necessary, the operates the pumps to inject chemicals.

Ordering Options

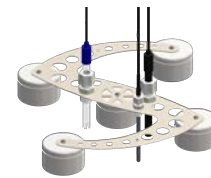

MPX2-P +ORP

- Standard: pH/Temp only
+ORP: Add ORP
- P: Panel Assembly Option
- 1: Single Pump
- 2: Dual Pump
- 4: Quad Pump

Optional Accessories

Sensor & Injection Manifolds

PPX Probe Pontoon

GCX Control System
