

RX4i independently operates four receptacles for control of equipment such as: irrigation pumps, CO2 equipment, fans, lighting trigger cords, etc.

Connects instantly to Agrowtek's control systems or intelligent sensors via a GrowNET™ port for advanced automated control functions. GrowNET™ port accepts MODBUS RTU communication for PLC control with the LX2 ModLINK.

LED indicators on the front panel provide status of each outlet. Rugged metal enclosure for wall mounting. Durable 20A relays and 15A receptacles. Conduit knock-outs and screw terminals for easy electrical installation.

Flexible and reliable outlet controller suitable for many applications.

Features

Four independent relay outlets with status indicator lights

120V / 15A Capacity
Built-in DC power supply, no external adapter

Internal terminal block connection
Available with power cord kit

1-Year Warranty

WiFi optional for direct control

GrowNET™ Digital Communication Port

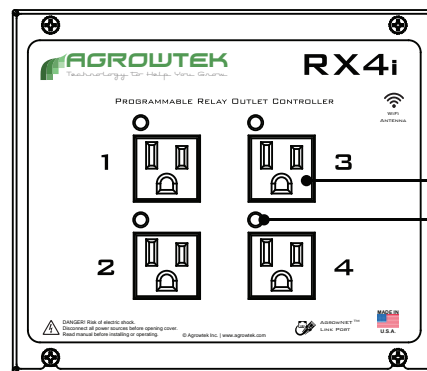

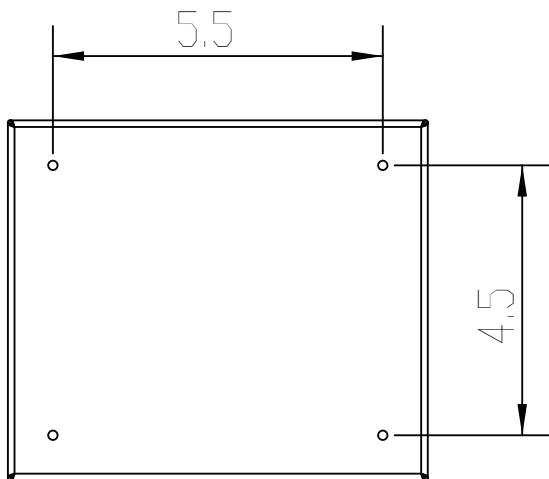

MODBUS RTU for industrial PLC control

Durable powder-coated steel enclosure

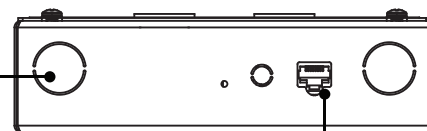

Made in USA

Independently Controlled Outlets
Relay Status Indicator LEDs

1/2" EMT Knock-outs

GrowNET™ Port

Applications

Carbon Dioxide Tanks, Generators

Lights & Lighting "Trigger" Cords

Water Irrigation Pumps

Exhaust & Circulation Fans

Humidification / Dehumidification Equipment

Industrial Automation & Hobby Projects

GrowControl™ GCX Controller

Connect to GrowControl™ Cultivation Controllers for advanced functions as part of a complete facility control solution. GrowControl™ GCX systems feature intelligent control functions optimized for today's complex growing environments.

Mini Controller

Connect the RX4i relay directly to Agrowtek's intelligent SXE climate sensors to create a basic environmental control system. Program outputs individually for temperature, humidity, or CO2 control in addition to 24-hour and cycle timer control. Uses the GrowNET™ ports and a cross-over cable to link the devices together.

MODBUS

GrowNET™ devices are easy to implement on PLC systems with MODBUS RTU and a LX2 ModLINK interface. Multiple GrowNET™ devices can be connected to an interface with HX8 GrowNET™ hubs.
