

## **THE ORIGINAL RESINATOR XL**

### **Cleaning Instructions/Tips**

- We recommend cleaning all Resinator components between uses.**
- It's always easier to clean components right away. (Especially in water applications.)**
- All components can be sprayed down with water. (Except for motor.)**
- All collection tools are water safe.**
- Hang drum screen by metal clips to clothes line & spray with garden hose.**
- Place drum screen in an enclosed container with isopropyl and shake vigorously.**
- Utilize isopropyl, followed by food grade H<sub>2</sub>O<sub>2</sub>, for deep cleaning.**
- Attach H<sub>2</sub>O connection/quick release coupler to garden hose and insert into drum shaft coupler attachment to flush center shaft with water.**

The Original
