

FLEXClip^{2.0}_{tm}

new generation

FLEXCLIPTM 2.0
NEW GENERATION 2023

 **LAPIERRE**
naturally innovative

2023 MARKS THE ARRIVAL OF THE

FLEXClip^{2.0}_™

new generation

Patent Pending

If the **ingenious ease of installation** remains the key feature of this second generation, brand-new attributes come to reinforce its stability and sealing properties.

QUICK AND EASY INSTALLATION

Simple and intuitive installation procedure done in no time.

1. Clip
2. Drill
3. Turn
4. Screw

- Innovative integrated positioning and drilling template:
 - Extremely practical and unique template in the market,
 - Consistently positions the inlet at the ideal angle of 55 to 60 degrees,
 - Facilitates the installation of the lateral line and extends its integrity.
- Installs on any mainline with a diameter corresponding to the FLEXCLIP[™] 2.0.

IMMOBILITY OF FLEXCLIP[™] 2.0

- Protruding Chimney:
- Prevents any movement of the FLEXCLIP[™] 2.0 on the mainline,
- The “click” sound simplifies the final placement of the FLEXCLIP[™] 2.0.

MAINLINE INTEGRITY

- Since it rests on 87% of the mainline’s circumference, the FLEXCLIP[™] 2.0 allows the tubing to maintain good circularity.

PROVEN SELF-ADHESIVE SEAL

- Made of food-grade silicone.
- Firmly pre-installed at the factory.
- New optimized dimensions for proven sealing.
- Receiving cavity:
 - Compact cavity that securely immobilizes the self-adhesive seal,
 - Bumpers that consistently ensure the ideal compression of the seal for optimal water-proofing.

DIMENSIONS

- 1 inch
- Other sizes available soon

STAINLESS STEEL SCREW

- Included

99, rue de l'Escale, Saint-Ludger, Beauce, QC G0M 1W0 CANADA
