

# How-To-Use Google Home to Control Your Smart Devices

## 1. Let's Get Started

Prior to using Google Home to control your devices, make sure that the following conditions are met:

- You have a Google Home Device or an Android phone with Google Assistant.
- You have the latest Google Home app (for Android phones only).
- You have a Google Account.
- You have the eco4life app and have registered an account.
- You have Smart Device/s that you want Google Home to control.
- You have a stable Wi-Fi to connect with the Google Server

## 2. Add devices in eco4life app (Refer to App Instruction)

You can skip this part if you've already added some device to your eco4life account. The device's name will therefore be recognized.

### 2.1. Download eco4life app (Refer to App Instruction)

You can scan the QR code below to download the eco4life app:

You can also search "eco4life" in either App Store or Google Play to install the app.

APP Download

1

### 2.2. Register a eco4life account and sign in on the app (Refer to App Instruction)

Open the eco4life app, tap "Register" to register an account, then sign in on the app.

### 2.3. Adding and Naming a Device

Sign in on your eco4life account, add the device and assign a name that can easily be recognized, such as: "bedroom light".

### 3. Google Home Set-up/ Home Control Configuration

You can skip this part if your Google Home is already set up.

- Make sure your Google Home is plugged in and has power.
- Open the Google Home app by tapping the app icon on your mobile device.
- Tap "ACCEPT" to agree to the Terms of Service and Privacy Policy. Allow Google Home app to access the device location to discover and set up nearby devices.

2

- Tap "SIGN IN", choose one Google account that is currently logged in on your phone. Or follow the instructions to sign in with a new Google account.

- Google Home app will scan nearby devices that are connected on power and are ready to set up.

3

- When Google Home app is successfully connected to the Google Home device, tap "PLAY TEST SOUND", it will play a test sound to confirm you are connected to the right device. If you heard the test sound, tap "I HEARD IT".

4

- Select the Room (example: Living Room) where your Google Home is located. This helps you identify the device when you want to connect to it. Choose the Wi-Fi network you want to connect with your Google Home. To automatically fetch the password for this network on this device, tap "OK", then the password will populate in the password field. You can also manually enter your password. Then tap "CONTINUE".

5

- Google Home will now attempt to connect to the Wi-Fi network. Once Google Home successfully connects with your Wi-Fi network, tap "CONTINUE".

6

- In order for the Google assistant to answer your questions and to enjoy a personalized experience, you must sign it on your Google account, then tap "SIGN UP". Choose the Google account you want to link to your Google Home device, then tap "CONTINUE AS XXX". Enter the address where this Google Home is installed, and select your default music service.

7

- Tap "SKIP TUTORIAL" to finish the setup. You can also tap "CONTINUE" to watch the Google Home tutorial.

8

### 3.2. Link eco4life account in Home Control

ATTENTION: Due to the Google Home app's known bug, you could only use one Google account to control "Home Control Action". If you sign in on Google Home app with several Google accounts, only the first Google account you used to sign in can be used for "Home Control".

- Tap "Home Control" in the hamburger menu on the Google Home app's home page, then tap "+".

9

- Find "eco4life" on the list. On the new window, select your eco4life account's region, enter your eco4life account and password, then tap "Link Now". Once you have assigned rooms on all your devices, your devices will appear in the Home Control page.

10

### 4. Control your smart devices through Google Home

Now you can control your smart devices through Google Home. Take bedroom light as the example, the supported voice commands are as below:

- Ok Google, turn on/off bedroom light.
- Ok Google, set bedroom light to 50 percent.
- Ok Google, brighten bedroom light.
- Ok Google, dim bedroom light.
- Ok Google, set bedroom light to red.
