Customs tariff 82041100 number:

• L-keys for hexagonal socket screws

- · Hex-Plus allows socket head screws to live longer
- L-keys are quickly to hand thanks to their size markings
- · Wear-resistant size marking
- Wear-resistant clip material for enhanced durability

9 L-keys with plastic sleeve (SPKL) made from circular, grippable material. The sleeve makes working comfortable even at low temperatures and is easy on the fingers. All L-keys are easily accessible due to their colour coding and size markings. The wear-free material of the clip guarantees easy removal and a secure hold of the L-key. For hexagonal socket screws.

L-Keys for Hexagon Socket Screws

L-keys made from circular material fit into the hand better and allow less strenuous work over a longer period. Additionally, the rubber sleeve provides a pleasant grip, particularly in applications at low temperatures. Colour coding and large stamp enable the desired L-key to be easily located. Moreover, the round material keys are more robust, particularly where smaller sizes are concerned.

Hex-Plus

Hexagon screws can endure a problem because the contact surfaces delivering the power from conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw can become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! At the same time, as much as 20 % more torque can be applied. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

Ball tip

The spherical drive profile means that it is possible to swivel the axis of the tool to that of the screw, and therefore enable angled, "around-the-corner" screwdriving jobs.

Take it easy tool finder system

We questioned the classic L-key

design, since all too often the

screw head recess is rounded out,

meaning screws can no longer be

tightened or loosened - and so the

user finds the L-key slipping out of

the recess. Wera Hex-Plus tools

have a larger contact surface in

the screw head. The notching

effects are reduced and thereby

the deformation of the screws. At

the same time, as much as 20 %

more torque can be applied.

Take it easy tool finder system—with profile and size colour-coding for quick and easy tool selection. Colour-coded system for hexagon drive screws (L-Keys, Zyklop bit sockets), external hex drive screws and nuts (Joker wrenches, Zyklop sockets and Zyklop bit sockets with holding function), and TORX® drive screws (L-Keys, Zyklop bit sockets).

Secure hold and easy removal

The wear-resistant clip material ensures that the L-keys are securely held yet are easy to remove.
