

**3816 R Bitholding screwdriver with Rapidaptor quick-release chuck, stainless, 1/4"  
x 119 mm**  
Bitholding Screwdrivers and Adaptors

<b>EAN:</b>	4013288127570	<b>Size:</b>	119x33x33 mm
<b>Part number:</b>	05051465001	<b>Weight:</b>	73 g
<b>Article number:</b>	3816 R	<b>Country of origin:</b>	CZ
		<b>Customs tariff number:</b>	82079030

- Solution to the extraneous rust problem: fasten stainless screws with stainless tools
- Bit handholder with Rapidaptor quick-release chuck, stainless
- Secure clamping of bits
- Fast bit change
- Free-turning sleeve for guiding the power tool

High quality holder for stainless steel bits so as to avoid the formation of extraneous rust. The Rapidaptor quick-release chuck enables rapid bit change without needing any special tools. Kraftform Plus handle for pleasant, ergonomic working that makes blisters and calluses a thing of the past. Hard gripping zones for high working speeds whereas soft zones ensure high torque transfer. Suitable for bits with 1/4" hexagon head drive as per DIN ISO 1173-C 6.3 and E 6.3 (ISO 1173).

# 3816 R Bitholding screwdriver with Rapidaptor quick-release chuck, stainless, 1/4"

x 119 mm

Bitholding Screwdrivers and Adaptors

## Screw stainless steel together with stainless steel!

Solution to the rust problem: screwdriving stainless steel together with stainless steel! Wera stainless steel tools are manufactured out of stainless steel so unsightly rust can be avoided.

## Rapid-in and self-lock

The bit can be pushed into the adaptor without moving the sleeve. The lock is activated automatically as soon as the bit is applied to the screw. Bits are held securely and wobble-free.

## Rapid-out

Simply push the sleeve forward to change the bit. The spring mechanism lifts the bit off the magnet and unlocks the tool. The bit can be easily removed. The rapid-out function makes it easy to remove even the smallest bits without extra tools.

## Chuck-all

The Rapidaptor quick-release chucks hold 1/4" DIN ISO 1173-C 6,3 and E 6,3 as well as Wera series 1 and 4 bits.

## Rapid-spin

The free-turning sleeve allows screw steadying at the start of the screwdriving process. This makes it easier to apply the tool to the screw and prevents slipping. It can also be used as a short extension for 1/4" applications e.g. in combination with the Wera Zyklop Ratchets.

## Single-hand function

Every function of the Rapidaptor quick-release chuck, such as inserting or releasing bits, can be carried out with one hand. This is faster, more economical and more ergonomic. There are no unnecessary manoeuvres.

## Kraftform

The basic idea for the prototype of the Kraftform handle - that the hand should dictate the design - has, right through to today, proved to be correct. In cooperation with the internationally recognised Fraunhofer IAO Institute, Wera developed a screwdriver handle designed to match the shape of the human hand as long ago as the 1960s. After a long development phase, the Wera Kraftform handle was launched to the market in 1968. It has been optimised through the years with new technologies, but has kept its proven shape. After all, the human hand has not changed either.

## Prevents hand injuries

The outstanding design of the Kraftform handle that fits perfectly into the hand prevents hand injuries such as blisters and calluses.
