L-Keys for Hexagon Socket Screws

EAN: 4013288098092 **Size:** 90x25x6 mm

Part number:05133155001Weight:19 gArticle number:950 PKSCountry of origin:CZ

Customs tariff 82041100

number:

- L-keys for hexagonal socket screws
- Hexagonal ballpoint on the long arm
- Short design for particularly confined screwdriving situations
- L-keys with Hex-Plus advantage for a longer screw life
- High corrosion protection thanks to chrome-plating

High quality L-key with extra-short arm for use on difficult-to-access screws; for hexagon socket screws. The Hex-Plus profile offers a greater contact surface in the head of the screw. The notching effect is therefore reduced to a minimum and damage to the screw head more or less eliminated. The ballpoint on the long arm allows dependable working even in difficult installation situations. The precise chrome-plated design ensures high corrosion protection. Laser-engraved and thereby wear-resistant size markings on the L-keys for rapid accessing.

L-Keys for Hexagon Socket Screws

We questioned the classic L-key

design, since all too often the

screw head recess is rounded out,

meaning screws can no longer be

tightened or loosened - and so the

user finds the L-key slipping out of

the recess. Wera Hex-Plus tools

have a larger contact surface in the screw head. The notching

effects are reduced and thereby

the deformation of the screws. At

the same time, as much as 20 %

more torque can be applied.

L-Keys

Hex-Plus

Hexagon screws can endure a problem because the contact surfaces delivering the power from the conventional tool, is transferred to the screw via very small surface areas. The consequence: the screw can become damaged (rounding out). Hex-Plus tools have a greater contact surface that prevents this from happening! At the same time, as much as 20 % more torque can be applied. Good to know: Hex-Plus tools fit into every standard hexagon socket screw!

Ball tip

The spherical drive profile means that it is possible to swivel the axis of the tool to that of the screw, and therefore enable angled, "around-the-corner" screwdriving jobs.

Size identification

The size of each L-keys has been engraved by a laser. In addition Take it easy L-keys have a colour coding according to sizes - for simple and rapid accessing of the required tool. Making it easy to find the right tool.

Surface protection

Chrome-plated hexagon L-keys for outstanding surface protection and long service life. High corrosion protection.
